Journal of Neurosurgery

July 2006, Volume 105, Number 1

Clinical Articles:

Ventriculoperitoneal shunt insertion for the treatment of refractory perilymphatic fistula. S. Scott Lollis, Dudley J. Weider, Joseph M. Phillips, and David W. Roberts 1

Comparison between neuroimaging classifications and histopathological diagnoses using an international multicenter brain tumor magnetic resonance imaging database. Margarida Julià-Sapé, Dionisio Acosta, Carles Majós, Àngel Moreno-Torres, Pieter Wesseling, Juan José Acebes, John R. Griffiths, and Carles Arús 6

Prospective analysis of prevalence, distribution, and rate of recovery of left ventricular systolic dysfunction in patients with subarachnoid hemorrhage. Nader Banki, Alexander Kopelnik, Poyee Tung, Michael T. Lawton, Daryl Gress, Barbara Drew, Michael Dae, Elyse Foster, William Parmley, and Jonathan Zaroff 15

Use of surface electromyography to assess and select patients with idiopathic dystonia for bilateral pallidal stimulation. Shouyan Wang, Xuguang Liu, John Yianni, Alex L. Green, Carole Joint, John F. Stein, Peter G. Bain, Ralph Gregory, and Tipu Z. Aziz 21

Evaluation, management, and long-term follow up of vein of Galen malformations. Arun Kumar Gupta, Vedula Rajani Kanth Rao, Dandu Ravi Varma, Tirur R. Kapilamoorthy, Chandrasekharan Kesavadas, Thamburaj Krishnamoorthy, Bejoy Thomas, Narendra K. Bodhey, and Sukalyan Purkayastha 26

Volumetric extent of resection and residual contrast enhancement on initial surgery as predictors of outcome in adult patients with hemispheric anaplastic astrocytoma. G. Evren Keles, Edward F. Chang, Kathleen R. Lamborn, Tarik Tihan, Chih-Ju Chang, Susan M. Chang, and Mitchel S. Berger 34

Cellular immunity of patients with malignant glioma: prerequisites for dendritic cell vaccination immunotherapy. Marion Rapp, Zakir Özcan, Hans-Jakob Steiger, Peter Wernet, Michael C. Sabel, and Rüdiger V. Sorg 41

Dural involvement in primary extradural meningiomas of the cranial vault. Hischam Bassiouni, Siamak Asgari, Uwe Hübschen, Hermann-Josef König, and Dietmar Stolke 51

Meningothelioma as the predominant histological subtype of midline skull base and spinal meningioma. Joung H. Lee, Burak Sade, Eugene Choi, Mladen Golubic, and Richard Prayson 60

Diagnostic method for differentiating external hydrocephalus from simple subdural hygroma. Phi-Woo Huh, Do-Sung Yoo, Kyung-Suok Cho, Chun-Kun Park, Seok-Gu Kang, Young-Sup Park, Dal-Soo Kim, and Moon-Chan Kim 65

Subtraction ictal single-photon emission computed tomography coregistered to magnetic resonance imaging in evaluating the need for repeated epilepsy surgery. Nicholas M. Wetjen, Gregory D. Cascino, A. James Fessler, Elson L. So, Jeffrey R. Buchhalter, Brian P. Mullan, Terence J. O'Brien, Fredric B. Meyer, and W. Richard Marsh 71

Altered expression of connexin subtypes in mesial temporal lobe epilepsy in humans. Frederic Collignon, Nicholas M. Wetjen, Aaron A. Cohen-Gadol, Gregory D. Cascino, Joseph Parisi, Fredric B. Meyer, W. Richard Marsh, Patrick Roche, and Stephen D. Weigand 77

Laboratory Investigations:

Apoptosis in human glioblastoma cells produced using embryonic stem cell–derived astrocytes expressing tumor necrosis factor–related apoptosis-inducing ligand. Isabelle M. Germano, Mahmud Uzzaman, Ronald J. Benveniste, Milana Zaurova, and Gordon Keller 88

Survival and early differentiation of human neural stem cells transplanted in a nonhuman primate model of stroke. Ben Z. Roitberg, Erwin Mangubat, Er-Yun Chen, Kiminobu Sugaya, Keith R. Thulborn, Jeffrey H. Kordower, Ambarish Pawar, Todd Konecny, and Marina E. Emborg 96

Functions of G protein–coupled receptor kinase interacting protein 1 in human neuronal (NT2N) cells. Ann-Shung Lieu, Jin Zhong Li, Donna J. Webb, Gerald R. Hankins, Shen-Long Howng, and Gregory A. Helm 103

An accelerated senescence response to radiation in *wild-type p53* glioblastoma multiforme cells. Quincy A. Quick and David A. Gewirtz 111

Participation of an abnormality in the transforming growth factor–β signaling pathway in resistance of malignant glioma cells to growth inhibition by that factor. Lei Zhang, Eiji Sato, Kenichi Amagasaki, Atsuhito Nakao, and Hirofumi Naganuma ... 119

Case Reports and Technical Notes:

Fourth ventricle rosette-forming glioneuronal tumor. Case report. Mahlon Johnson, John Pace, and Judy F. Burroughs 129

Glioblastoma multiforme with diffusion-weighted magnetic resonance imaging characteristics mimicking primary brain lymphoma. Case report. Cheng-Hong Toh, Yao-Liang Chen, Tsung-Che Hsieh, Shih-Ming Jung, Ho-Fai Wong, and Shu-Hang Ng 132

Sarcomatous transformation of clival chordoma after charged-particle radiotherapy. Report of two cases. Takayuki Hara, Nobutaka Kawahara, Koji Tsuboi, Junji Shibahara, Tetsuo Ushiku, and Takaaki Kirino 136

Hemichorea due to hemodynamic ischemia associated with extracranial carotid artery stenosis. Report of two cases. Ryoma Morigaki, Masaaki Uno, Atsuhiko Suzue, and Shinji Nagahiro 142

Decompression of cavernous sinus meningioma for preservation and improvement of cranial nerve function. Technical note. William T. Couldwell, Peter Kan, James K. Liu, and Ronald I. Apfelbaum 148

Accurate placement of the distal end of a ventriculoatrial shunt with the aid of real-time transesophageal echocardiography. Technical note. Theofilos G. Machinis, Kostas N. Fountas, John Hudson, Joe Sam Robinson, and E. Christopher Troup 153

Book Reviews 157

Notices 159

Journal of Neurosurgery

August 2006, Volume 105, Number 2

EDITORIAL:

Prognostic indicators. ATOM SARKAR AND E. ANTONIO CHIOCCA . . . 161
Response. OSSAMA AL-MEFTY . . . 162

CLINICAL ARTICLE:

Progesterone and estrogen receptors: opposing prognostic indicators in meningiomas. SVETLANA PRAVDENKOVA, OSSAMA AL-MEFTY, JEFFREY SAWYER, AND MUHAMMAD HUSAIN . . . 163

EDITORIAL:

Neurostimulation for chronic noncancer pain. KIM J. BURCHIEL . . . 174
Response. ROBERT J. COFFEY AND ANDRES M. LOZANO . . . 174

CLINICAL ARTICLE:

Neurostimulation for chronic noncancer pain: an evaluation of the clinical evidence and recommendations for future trial designs. ROBERT J. COFFEY AND ANDRES M. LOZANO . . . 175

EDITORIAL:

Early experience with Matrix detachable coils. ROBERTO C. HEROS AND ALOIS ZAUNER . . . 190
Response. YUICHI MURAYAMA AND FERNANDO VIÑUELA . . . 191

CLINICAL ARTICLES:

Initial clinical experience with Matrix detachable coils for the treatment of intracranial aneurysms. YUICHI MURAYAMA, FERNANDO VIÑUELA, AKIRA ISHII, YIH-LIN NIEN, ICHIRO YUKI, GARY DUCKWILER, AND REZA JAHAN . . . 192
Vascular complications of vestibular schwannoma surgery: a comparison of the suboccipital retrosigmoid and translabyrinthine approaches. BURAK SADE, GÉRARD MOHR, AND JEAN-JACQUES DUFOUR . . . 200
Surgery for large vestibular schwannomas: how patients and surgeons perceive quality of life. KEYVAN NICOUCAR, SHAHAN MOMJIAN, JOHN-PAUL VADER, AND NICOLAS DE TRIBOLET . . . 205
Gamma Knife surgery for metastatic brainstem tumors. CHUN PO YEN, JASON SHEEHAN, GREG PATTERSON, AND LADISLAU STEINER 213
Effects of balloon angioplasty on perfusion- and diffusion-weighted magnetic resonance imaging results and outcome in patients with cerebral vasospasm. JÜRGEN BECK, ANDREAS RAABE, HEINER LANFERMANN, JOACHIM BERKEFELD, RICHARD DU MESNIL DE ROCHEMONT, FRIEDHELM ZANELLA, VOLKER SEIFERT, AND STEFAN WEIDAUER . . . 220
Magnetic resonance angiography and clinical evaluation of third nerve palsies and posterior communicating artery aneurysms. MARK J. KUPERSMITH, GORDON HELLER, AND TERRY A. COX . . . 228
Primary stent therapy for symptomatic intracranial atherosclerotic stenosis: 1-year follow-up angiographic and midterm clinical outcomes. CHANG-YOUNG LEE AND MAN-BIN YIM . . . 235
Surgical shunt infection: significant reduction when using intraventricular and systemic antibiotic agents. BRIAN T. RAGEL, SAMUEL R. BROWD, AND RICHARD H. SCHMIDT . . . 242
Long-term natural history of hemangioblastomas in patients with von Hippel–Lindau disease: implications for treatment. JOSHUA M. AMMERMAN, RUSSELL R. LONSER, JAMES DAMBROSIA, JOHN A. BUTMAN, AND EDWARD H. OLDFIELD . . . 248
Metastases to hemangioblastomas in von Hippel–Lindau disease. S. TAYLOR JARRELL, ALEXANDER O. VORTMEYER, W. MARSTON LINEHAN, EDWARD H. OLDFIELD, AND RUSSELL R. LONSER . . . 256
Tako-tsubo cardiomyopathy in aneurysmal subarachnoid hemorrhage: an underappreciated ventricular dysfunction. VIVIEN H. LEE, HEIDI M. CONNOLLY, JIMMY R. FULGHAM, EDWARD M. MANNO, ROBERT D. BROWN JR., AND EELCO F. M. WIJDICKS . . . 264
Endoscopic resection of solid intraventricular brain tumors. MARK M. SOUWEIDANE AND NEAL LUTHER . . . 271

LABORATORY INVESTIGATIONS:

Three-tesla magnetic resonance imaging of the ventrolateral thalamus: a correlative anatomical description. RODRIGO MERCADO, TOMASZ MANDAT, G. R. WAYNE MOORE, DAVID LI, ALEX MACKAY, AND CHRISTOPHER R. HONEY . . . 279
Effect of subthalamic nucleus lesions in a 6-hydroxydopamine–induced rat parkinsonian model: behavioral and biochemical studies. YONG SUP HWANG, INSOP SHIM, BOM BEE LEE, AND JIN WOO CHANG . . . 284
Involvement of phospholipase C in endothelin 1–induced stimulation of CA^{++} channels and basilar artery contraction in rabbits. YOSHIFUMI KAWANABE, TOMOH MASAKI, AND NOBUO HASHIMOTO . . . 288
Optic radiations: a microsurgical anatomical study. JOHANN PELTIER, NADINE TRAVERS, CHRISTOPHE DESTRIEUX, AND STÉPHANE VELUT . . . 294
Anatomical analysis of transoral surgical approaches to the clivus. VIJAYABALAN BALASINGAM, GREGORY J. ANDERSON, NEIL D. GROSS, CHENG-MAO CHENG, AKIO NOGUCHI, ACLAN DOGAN, SEAN O. MCMENOMEY, JOHNNY B. DELASHAW JR., AND PETER E. ANDERSEN . . . 301

CASE REPORTS:

Concurrent lymphocytic hypophysitis and pituitary adenoma. Case report and review of the literature. SHAYE I. MOSKOWITZ, AMIR HAMRAHIAN, RICHARD A. PRAYSON, MERCEDES PINEYRO, ROBERT R. LORENZ, AND ROBERT J. WEIL . . . 309
Subdural hemorrhage in the posterior fossa caused by a ruptured cavernous carotid artery aneurysm after a balloon occlusion test. Case report. NORBERTO ANDALUZ, THOMAS A. TOMSICK, JEFFREY T. KELLER, AND MARIO ZUCCARELLO . . . 315
Spontaneous bacterial peritonitis causing *Serratia marcescens* and *Proteus mirabilis* ventriculoperitoneal shunt infection. Case report. LUIS M. TUMIALÁN, FRANKLIN LIN, AND SANJAY K. GUPTA . . . 320
Gamma Knife surgery–induced meningioma. Report of two cases and review of the literature. JASON SHEEHAN, CHUN PO YEN, AND LADISLAU STEINER . . . 325
Primary cerebellopontine angle craniopharyngioma in a patient with Gardner syndrome. Case report and review of the literature. KRISTIAN AQUILINA, DONNCHA F. O'BRIEN, MICHAEL A. FARRELL, AND CIARAN BOLGER . . . 330

BOOK REVIEWS . . . 334

NEUROSURGICAL FORUM: Letters to the Editor . . . 336

NOTICES . . . 342

SCIENTIFIC POSTER AWARD RECIPIENTS, 2006 AANS 74TH ANNUAL MEETING, APRIL 22–27, 2006 . . . 345

Journal of Neurosurgery

September 2006, Volume 105, Number 3

EDITORIAL:

Osteogenesis imperfecta. ARNOLD H. MENEZES 359
Response. JANNA WALTIMO-SIRÉN 359

CLINICAL ARTICLE:

Skull base abnormalities in osteogenesis imperfecta: a cephalometric evaluation of 54 patients and 108 control volunteers. OUTI KOVERO, SEPPO PYNNÖNEN, KAIJA KUURILA-SVAHN, ILKKA KAITILA, AND JANNA WALTIMO-SIRÉN ... 361

EDITORIAL:

Brain metastasis. FRED G. BARKER II 371
Response. LISA R. ROGERS 372

CLINICAL ARTICLES:

Results of a phase II trial of the GliaSite Radiation Therapy System for the treatment of newly diagnosed, resected single brain metastases. LISA R. ROGERS, JACK P. ROCK, ALLEN K. SILLS, MICHAEL A. VOGELBAUM, JOHN H. SUH, THOMAS L. ELLIS, VOLKER W. STIEBER, ANTHONY L. ASHER, ROBERT W. FRASER, JUDITH S. BILLINGSLEY, PAUL LEWIS, DAWID SCHELLINGERHOUT, BRAIN METASTASIS STUDY GROUP, AND EDWARD G. SHAW 375
Phase II study of nimustine, carboplatin, vincristine, and interferon-β with radiotherapy for glioblastoma multiforme: experience of the Kyoto Neuro-Oncology Group. TOMOKAZU AOKI, JUN A. TAKAHASHI, TETSUYA UEBA, NATSUO OYA, MASAHIRO HIRAOKA, KUNIHIKO MATSUI, TSUGIYA FUKUI, YASUAKI NAKASHIMA, MASATSUNE ISHIKAWA, AND NOBUO HASIMOTO 385

EDITORIALS:

Balloon-assisted coil embolization of intracranial aneurysms. FREDRIC B. MEYER 392
Complications of balloon-assisted coil embolization of intracranial aneurysms. ROBERTO C. HEROS 393
Response. MENNO SLUZEWSKI, WILLEM JAN VAN ROOIJ, GUUS N. BEUTE, AND PETER C. NIJSSEN 394

CLINICAL ARTICLES:

Balloon-assisted coil embolization of intracranial aneurysms: incidence, complications, and angiography results. MENNO SLUZEWSKI, WILLEM JAN VAN ROOIJ, GUUS N. BEUTE, AND PETER C. NIJSSEN 396
Blood blister–like aneurysms at nonbranching sites of the internal carotid artery. SOOK YOUNG SIM, YONG SAM SHIN, KYUNG GI CHO, SUN YONG KIM, SE HYUK KIM, YOUNG HWAN AHN, SOO HAN YOON, AND KI HONG CHO 400
Three-dimensional rotational angiography guidance for aneurysm surgery. ANDREAS RAABE, JÜRGEN BECK, STEFAN ROHDE, JOACHIM BERKEFELD, AND VOLKER SEIFERT 406
Influence of intraventricular hemorrhage and occlusive hydrocephalus on the long-term outcome of treated patients with basal ganglia hemorrhage: a case–control study. HAGEN B. HUTTNER, MARTIN KÖHRMANN, CHRISTIAN BERGER, DIMITRIOS GEORGIADIS, AND STEFAN SCHWAB 412

LABORATORY INVESTIGATIONS:

The role of *MMP-2* and *MMP-9* polymorphisms in sporadic intracranial aneurysms. HARIYADARSHI PANNU, DONG H. KIM, DONGCHUAN GUO, TERRI M. KING, GRACE VAN GINHOVEN, TOINETTE CHIN, KATHERINE CHANG, YUHUA QI, SANJAY SHETE, AND DIANNA M. MILEWICZ 418
Lysis of intracerebral hematoma with stereotactically implanted tissue plasminogen activator polymers in a rabbit model. QUOC-ANH THAI, GUSTAVO PRADILLA, FEDERICO G. LEGNANI, RYAN M. KRETZER, WESLEY HSU, AND RAFAEL J. TAMARGO 424
Prolongation of survival following depletion of $CD4^+CD25^+$ regulatory T cells in mice with experimental brain tumors. ABDELJABAR EL ANDALOUSSI, YU HAN, AND MACIEJ S. LESNIAK 430
Gene expression and molecular changes in cerebral arteries following subarachnoid hemorrhage in the rat. PETTER VIKMAN, SAEMA BEG, TEJVIR KHURANA, JACOB HANSEN-SCHWARTZ, AND LARS EDVINSSON 438
Focal disruption of the blood–brain barrier due to 260-kHz ultrasound bursts: a method for molecular imaging and targeted drug delivery. KULLERVO HYNYNEN, NATHAN MCDANNOLD, NATALIA VYKHODTSEVA, SCOTT RAYMOND, RALPH WEISSLEDER, FERENC A. JOLESZ, AND NICKOLAI SHEIKOV 445

CASE REPORTS AND TECHNICAL NOTES:

Recurrent late cerebral necrosis with aggressive characteristics after radiosurgical treatment of an arteriovenous malformation. Case report. H. ISAAC CHEN, MARK G. BURNETT, JASON T. HUSE, ROBERT A. LUSTIG, LINDA J. BAGLEY, AND ERIC L. ZAGER 455
Oligodendroglioma of the pineal region. Case report. SUNIT DAS, JAMES P. CHANDLER, ANIA POLLACK, EILEEN H. BIGGIO, LESLIE DIAZ, JEFFREY J. RAIZER, AND H. HUNT BATJER 461
Tako-tsubo cardiomyopathy: reversible heart failure with favorable outcome in patients with intracerebral hemorrhage. Case report. MARTIN H. DEININGER, DIRK RADICKE, JÜRGEN BUTTLER, KAI-MICHAEL SCHEUFLER, THOMAS FREIMAN, AND JOSEF F. ZENTNER 465
Angiographically occult, progressively expanding, giant vertebral artery aneurysm. Case report. RICARDO J. KOMOTAR, J MOCCO, SEAN D. LAVINE, AND ROBERT A. SOLOMON 468

Central brain herniation secondary to fulminant acute disseminated encephalomyelitis: implications for neurosurgical management. Case report. Raymond F. Sekula Jr., Edward M. Marchan, Parviz Baghai, Peter J. Jannetta, and Matthew R. Quigley 472
Very low pressure hydrocephalus. Report of two cases. Michelle J. Clarke, Cormac O. Maher, Georgia Nothdurft, and Fredric Meyer 475
Retrograde suction decompression of giant paraclinoid aneurysms using a No. 7 French balloon–containing guide catheter. Technical note. Richard J. Parkinson, Bernard R. Bendok, Christopher C. Getch, Parham Yashar, Ali Shaibani, William Ankenbrandt, Issam A. Awad, and H. Hunt Batjer 479
Establishing tumor cell lines from aggressive telomerase-positive chordomas of the skull base. Technical note. Lucia Ricci-Vitiani, Francesco Pierconti, Maria Laura Falchetti, Giovanna Petrucci, Giulio Maira, Ruggero De Maria, Luigi Maria Larocca, and Roberto Pallini 482
Intraoperative ventricular puncture during supraorbital craniotomy via an eyebrow incision. Technical note. Tomas Menovsky, Joost de Vries, Johannes A. L. Wurzer, and J. Andre Grotenhuis 485

Historical Vignettes:

Personal recollections of Walter E. Dandy and his Brain Team. Irving J. Sherman, Ryan M. Kretzer, and Rafael J. Tamargo 487
Bo Sung Sim (1924–2001): a pioneer of neurosurgery in Korea. Dong Gyu Kim, Chul-Kee Park, and Sun Ha Paek 494

Book Reviews 498

Notices 508

Journal of Neurosurgery

October 2006, Volume 105, Number 4

EDITORIAL:

Meningiomas involving the sinus. ROBERTO C. HEROS 511
Response. MARC P. SINDOU AND JORGE E. ALVERNIA 513

CLINICAL ARTICLE:

Results of attempted radical tumor removal and venous repair in 100 consecutive meningiomas involving the major dural sinuses. MARC P. SINDOU AND JORGE E. ALVERNIA 514

EDITORIAL:

Vestibular schwannoma. ROBERT L. MARTUZA 526
Response. MADJID SAMII, AMIR SAMII, AND VENELIN GERGANOV 526

CLINICAL ARTICLE:

Improved preservation of hearing and facial nerve function in vestibular schwannoma surgery via the retrosigmoid approach in a series of 200 patients. MADJID SAMII, VENELIN GERGANOV, AND AMIR SAMII 527

EDITORIAL:

Asymptomatic meningiomas. WILLIAM T. COULDWELL 536
Response. SHIGETOSHI YANO AND JUN-ICHI KURATSU 537

CLINICAL ARTICLE:

Indications for surgery in patients with asymptomatic meningiomas based on an extensive experience. SHIGETOSHI YANO, JUN-ICHI KURATSU, AND THE KUMAMOTO BRAIN TUMOR RESEARCH GROUP 538

EDITORIAL:

Endarterectomy. FREDRIC B. MEYER 544
Response. KOJI IIHARA 544

CLINICAL ARTICLES:

Outcome of carotid endarterectomy and stent insertion based on grading of carotid endarterectomy risk: a 7-year prospective study. KOJI IIHARA, KENICHI MURAO, NOBUYUKI SAKAI, NAOAKI YAMADA, IZUMI NAGATA, AND SUSUMU MIYAMOTO 546
Gamma Knife surgery for metastatic brain tumors from renal cell carcinoma. TAKASHI SHUTO, SHIGEO INOMORI, HIDEYO FUJINO, AND HISATO NAGANO 555
In vivo accuracy of image guidance performed using optical tracking and optimized registration. CHRISTOPHER R. MASCOTT 561
Conventional neurocritical care and cerebral oxygenation after traumatic brain injury. MICHAEL F. STIEFEL, JOSHUA D. UDOETUK, ALEJANDRO M. SPIOTTA, VICENTE H. GRACIAS, AARON GOLDBERG, EILEEN MALONEY-WILENSKY, STEPHANIE BLOOM, AND PETER D. LE ROUX 568
Microhemorrhage, a possible mechanism for cyst formation in vestibular schwannomas. CHUL-KEE PARK, DONG-CHUL KIM, SUNG-HYE PARK, JEONG EUN KIM, SUN HA PAEK, DONG GYU KIM, AND HEE-WON JUNG 576
Cavernous angiomas within the internal auditory canal. MADJID SAMII, MAKOTO NAKAMURA, SHAHRAM MIRZAI, PETER VORKAPIC, AND ANDRES CERVIO 581
Motor field sensitivity for preoperative localization of motor cortex. PETER T. LIN, MITCHEL S. BERGER, AND SRIKANTAN S. NAGARAJAN 588

LABORATORY INVESTIGATIONS:

Preclinical evaluation of the neuroprotective effect of soluble complement receptor Type 1 in a nonhuman primate model of reperfused stroke. J MOCCO, WILLIAM J. MACK, ANDREW F. DUCRUET, RYAN G. KING, MICHAEL E. SUGHRUE, ALEXANDER L. COON, SERGEI A. SOSUNOV, ROBERT R. SCIACCA, YUAN ZHANG, HENRY C. MARSH JR., DAVID J. PINSKY, AND E. SANDER CONNOLLY JR. 595
Peripheral nerve regeneration through allografts compared with autografts in FK506-treated monkeys. CRISTINA AUBÁ, BERNARDO HONTANILLA, JUAN ARCOCHA, AND ÓSCAR GORRÍA 602
Use of a static magnetic field to promote recovery after peripheral nerve injury. MICHAEL O. KELLEHER, RASHID K. AL-ABRI, DAVID V. LENIHAN, AND MICHAEL A. GLASBY 610

CASE REPORTS AND TECHNICAL NOTES:

Ependymoma of the pituitary fossa. Case report and review of the literature. KARIM MUKHIDA, SYLVIA ASA, FRED GENTILI, AND PATRICK SHANNON 616
Long-term response of pituitary carcinoma to temozolomide. Report of two cases. CAMILO E. FADUL, ANDREW L. KOMINSKY, LOUISE P. MEYER, LINDA S. KINGMAN, WILLIAM B. KINLAW, C. HARKER RHODES, CLIFFORD J. ESKEY, AND NATHAN E. SIMMONS 621
Commercial flight and patients with intracranial mass lesions: a caveat. Report of two cases. LUDVIC U. ZRINZO, MATTHEW CROCKER, LAURENCE V. ZRINZO, DAVID G. T. THOMAS, AND LAURENCE WATKINS 627

Peroneal neuropathy following successful bariatric surgery. Case report and review of the literature. W. Jeffrey Elias, Nader Pouratian, Rod J. Oskouian, Bruce Schirmer, and Ted Burns 631
Percutaneous transvenous embolization of a dural arteriovenous fistula through a mastoid emissary vein. Technical note. Dennis J. Rivet, James K. Goddard III, Keith M. Rich, and Colin P. Derdeyn 636
Salvage of infected craniotomy bone flaps with the wash-in, wash-out indwelling antibiotic irrigation system. Technical note and case series of 12 patients. Kurtis I. Auguste and Michael W. McDermott 640

Notices 652

Journal of Neurosurgery

November 2006, Volume 105, Number 5

EDITORIAL:

Linear accelerator radiosurgery for vestibular schwannomas. JASON P. SHEEHAN 655
Response. WILLIAM A. FRIEDMAN 656

CLINICAL ARTICLE:

Linear accelerator radiosurgery for vestibular schwannomas. WILLIAM A. FRIEDMAN, PATRICK BRADSHAW, ADAM MYERS, AND FRANK J. BOVA 657

EDITORIAL:

Endovascular coil embolization in patients with poor neurological grades after aneurysmal rupture. ROBERTO C. HEROS 662
Response. SHUICHI SUZUKI, REZA JAHAN, GARY R. DUCKWILER, JOHN FRAZEE, NEIL MARTIN, AND FERNANDO VIÑUELA 663

CLINICAL ARTICLES:

Contribution of endovascular therapy to the management of poor-grade aneurysmal subarachnoid hemorrhage: clinical and angiographic outcomes. SHUICHI SUZUKI, REZA JAHAN, GARY R. DUCKWILER, JOHN FRAZEE, NEIL MARTIN, AND FERNANDO VIÑUELA 664
Risk of cerebral vasopasm after subarachnoid hemorrhage reduced by statin therapy: a multivariate analysis of an institutional experience. MATTHEW J. MCGIRT, ROBERT BLESSING, MICHAEL J. ALEXANDER, SHAHID M. NIMJEE, GRAEME F. WOODWORTH, ALLAN H. FRIEDMAN, CARMELO GRAFFAGNINO, DANIEL T. LASKOWITZ, AND JOHN R. LYNCH 671
Monitoring of muscle motor evoked potentials during cerebral aneurysm surgery: intraoperative changes and postoperative outcome. ANDREA SZELÉNYI, DAVID LANGER, KARL KOTHBAUER, ADAURI BUENO DE CAMARGO, EUGENE S. FLAMM, AND VEDRAN DELETIS 675
Multislice computed tomography angiography screening for new aneurysms in patients with previously clip-treated intracranial aneurysms: feasibility, positive predictive value, and interobserver agreement. IRENE C. VAN DER SCHAAF, BIRGITTA K. VELTHUIS, MARIEKE J. H. WERMER, NANNE J. FRENKEL, CHARLES B. L. M. MAJOIE, THEO D. WITKAMP, GERARD DE KORT, NICOLE J. FRELING, AND GABRIEL J. E. RINKEL ON BEHALF OF THE ASTRA STUDY GROUP 682
Radiosurgical treatment for rolandic arteriovenous malformations. YURI M. ANDRADE-SOUZA, MEERA RAMANI, DARYL SCORA, MAY N. TSAO, KAREL TERBRUGGE, AND MICHAEL L. SCHWARTZ 689
Split facial nerve course in vestibular schwannomas. CHRISTIAN STRAUSS, JULIAN PRELL, STEFAN RAMPP, AND JOHANN ROMSTÖCK 698
Intrasaccular combination of metallic coils and Onyx liquid embolic agent for the endovascular treatment of cerebral aneurysms. H. SARUHAN CEKIRGE, ISIL SAATCI, SERDAR GEYIK, KIVILCIM YAVUZ, HALIL ÖZTÜRK, AND GÜLSÜN PAMUK 706
Reliability of cobalt–chromium alloy aneurysm clips after long-term implantation in patients with cerebral aneurysms. YASUNARI OTAWARA, MIGUEL M. ENDO, KUNIAKI OGASAWARA, YOSHITAKA KUBO, AKIRA OGAWA, AND KOUICHI WATANABE 713
Using *endothelial nitric oxide synthase* gene polymorphisms to identify intracranial aneurysms more prone to rupture in Japanese patients. BORIS KRISCHEK, HIDETOSHI KASUYA, HIROYUKI AKAGAWA, ATSUSHI TAJIMA, AKIRA NARITA, HIDEAKI ONDA, TOMOKATSU HORI, AND ITURO INOUE 717
Magnesium infusion for vasospasm prophylaxis after subarachnoid hemorrhage. MARTINA STIPPLER, ELIZABETH CRAGO, ELAD I. LEVY, MARY E. KERR, HOWARD YONAS, MICHAEL B. HOROWITZ, AND AMIN KASSAM 723
Does dose rate affect efficacy? The outcomes of 256 Gamma Knife surgery procedures for trigeminal neuralgia and other types of facial pain as they relate to the half-life of cobalt. CHRISTOPHER J. BALAMUCKI, VOLKER W. STIEBER, THOMAS L. ELLIS, STEPHEN B. TATTER, ALLAN F. DEGUZMAN, KEVIN P. MCMULLEN, JAMES LOVATO, EDWARD G. SHAW, KENNETH E. EKSTRAND, J. DANIEL BOURLAND, MICHAEL T. MUNLEY, MICHAEL ROBBINS, AND CHARLES BRANCH 730
Oncocytic meningiomas: cases with benign histopathological features and a favorable clinical course. PASQUALE GALLINA, ANNA MARIA BUCCOLIERO, FURIO MARIOTTI, PASQUALE MENNONNA, AND NICOLA DI LORENZO 736

LABORATORY INVESTIGATIONS:

Genetic profiling of a distant second glioblastoma multiforme after radiotherapy: recurrence or second primary tumor? KRISTA A. VAN NIFTERIK, PAULA H. M. ELKHUIZEN, ROB J. VAN ANDEL, LUKAS J. A. STALPERS, SIEGER LEENSTRA, M. VINCENT M. LAFLEUR, W. PETER VANDERTOP, BEN J. SLOTMAN, THEO J. M. HULSEBOS, AND PETER SMINIA 739
Evaluation of particulate systems supporting tumor cell fractions in a preventive vaccination against intracranial rat glioma. ANNE SAPIN, ANNE CLAVREUL, EMMANUEL GARCION, JEAN-PIERRE BENOIT, AND PHILIPPE MENEI 745
Jugular tubercle: morphometric analysis and surgical significance. APOSTOLOS MINTELIS, TETSURO SAMESHIMA, KETAN R. BULSARA, LINDA GRAY, ALLAN H. FRIEDMAN, AND TAKANORI FUKUSHIMA 753
Expanded polytetrafluoroethylene graft for bypass surgery using the excimer laser–assisted nonocclusive anastomosis technique. MICHAEL REINERT, BON H. VERWEIJ, THOMAS SCHAFFNER, GEORGE MIHALACHE, GERHARD SCHROTH, ROLF W. SEILER, AND CORNELIS A. F. TULLEKEN 758

Case Reports and Technical Notes:

Photophobia in a blind patient: an alternate visual pathway. Case report. Amin Amini, Kathleen Digre, and William T. Couldwell 765

Spontaneous resolution of syringomyelia and Chiari malformation Type I in a patient with cerebrospinal fluid otorrhea. Case report. Nicholas D. Coppa, H. Jeffrey Kim, and Kevin M. McGrail 769

Postoperative dural sinus thrombosis in a patient in a hypercoagulable state. Case report. Bradley C. Lega and Daniel Yoshor 772

Stereotactic radiosurgery as adjuvant treatment for residual solitary fibrous tumor. Case report. Kuniaki Nakahara, Masaru Yamada, Satoru Shimizu, and Kiyotaka Fujii 775

Endovascular surgery for very small ruptured intracranial aneurysms. Technical note. Sachio Suzuki, Akira Kurata, Taketomo Ohmomo, Takao Sagiuchi, Jun Niki, Masaru Yamada, Hidehiro Oka, Kiyotaka Fujii, and Shinichi Kan 777

Treatment of vertebral artery aneurysms with transposition of the posterior inferior cerebellar artery to the vertebral artery combined with parent artery occlusion. Technical note. Kuniaki Ogasawara, Yoshitaka Kubo, Nobuhiko Tomitsuka, Masayuki Sasoh, Yasunari Otawara, Hiroshi Arai, and Akira Ogawa 781

Wrap-clipping with polytetrafluoroethylene for ruptured blisterlike aneurysms of the internal carotid artery. Technical note. Yoshitaka Kubo, Kuniaki Ogasawara, Nobuhiko Tomitsuka, Yasunari Otawara, Mikio Watanabe, and Akira Ogawa 785

Case Illustration:

Spontaneous thrombosis and resorption of a giant fusiform A_2 aneurysm. Case illustration. A. Celal Iplikcioglu, Cem Dinc, Sirzat Bek, and Kerem Bikmaz 788

Historical Vignette:

Neuroanatomy and cadaver dissection in Italy: history, medicolegal issues, and neurosurgical perspectives. Paola Frati, Alessandro Frati, Maurizio Salvati, Silvia Marinozzi, Riccardo Frati, Luciana Rita Angeletti, Manolo Piccirilli, Eugenio Gaudio, and Roberto Delfini 789

Notices 805

Journal of Neurosurgery

December 2006, Volume 105, Number 6

SPECIAL ARTICLE:

Meeting the challenges of neurosurgery. The 2006 presidential address. FREMONT P. WIRTH 807

EDITORIAL:

Health economics and the search for shunt-responsive symptomatic hydrocephalus in the elderly. JOHN DOUGLAS PICKARD, DAVID SPIEGELHALTER, AND MAREK CZOSNYKA 811

Response. SHERMAN C. STEIN, SEEMA S. SONNAD, AND MARK G. BURNETT 813

CLINICAL ARTICLES:

Shunts in normal-pressure hydrocephalus: do we place too many or too few? SHERMAN C. STEIN, MARK G. BURNETT, AND SEEMA S. SONNAD 815

Screening tests for normal-pressure hydrocephalus: sensitivity, specificity, and cost. MARK G. BURNETT, SEEMA S. SONNAD, AND SHERMAN C. STEIN 823

Physiological and clinical advantages of median nerve fascicle transfer to the musculocutaneous nerve following brachial plexus root avulsion injury. RAHUL K. NATH, ANDREW B. LYONS, AND GABRIEL BIETZ 830

Use of clinical signs and computed tomography myelography findings in detecting and excluding nerve root avulsion in complete brachial plexus palsy. JAYME AUGUSTO BERTELLI AND MARCOS FLÁVIO GHIZONI 835

Systemic metabolic effects of combined insulin-like growth factor–I and growth hormone therapy in patients who have sustained acute traumatic brain injury. JIMMI HATTON, RICHARD KRYSCIO, MELODY RYAN, LINDA OTT, AND BYRON YOUNG 843

Effectiveness and handling characteristics of a three-layer polymer dura substitute: a prospective multicenter clinical study. A. MARTINA MESSING-JÜNGER, JAVIER IBÁÑEZ, FABIO CALBUCCI, MAURICE CHOUX, GABRIEL LENA, IRADJ MOHSENIPOUR, AND FRANK VAN CALENBERGH 853

The role of recombinant activated factor VII in neurosurgery: hope or hype? GREGORY W. J. HAWRYLUK AND MICHAEL D. CUSIMANO 859

Minimally invasive implantation of the peritoneal catheter in ventriculoperitoneal shunt placement for hydrocephalus: analysis of 151 consecutive adult patients. ALAN BANI, DIETER TELKER, WERNER HASSLER, AND MATTHIAS GRUNDLACH 869

Resection of benign sciatic notch dumbbell-shaped tumors. ROBERT J. SPINNER, TOSHIKI ENDO, KIMBERLY K. AMRAMI, ERIC J. DOZOIS, DUSICA BABOVIC-VUKSANOVIC, AND FRANKLIN H. SIM 873

LABORATORY INVESTIGATIONS:

Quantitation of the lower subscapular nerve for potential use in neurotization procedures. R. SHANE TUBBS, CHARLES A. KHOURY, E. GEORGE SALTER, LESLIE ACAKPO-SATCHIVI, JOHN C. WELLONS III, JEFFREY P. BLOUNT, AND W. JERRY OAKES 881

Effects of ethanol on limited resuscitation in a model of traumatic brain injury and hemorrhagic shock. BRIAN J. ZINK, SUSAN A. STERN, BRIAN D. MCBETH, XU WANG, AND MICHELLE MERTZ 884

CASE REPORTS AND TECHNICAL NOTES:

Long-term electrical stimulation–induced inhibition of partial epilepsy. Case report. KOST ELISEVICH, KEN JENROW, LORI SCHUH, AND BRIEN SMITH 894

Boron neutron capture therapy for recurrent meningioma. Case report. YOJI TAMURA, SHIN-ICHI MIYATAKE, NAOSUKE NONOGUCHI, SHIRO MIYATA, KUNIO YOKOYAMA, ATSUSHI DOI, TOSHIHIKO KUROIWA, MASAHIRO ASADA, HIDEKI TANABE, AND KOJI ONO 898

Gliosarcoma with infratemporal fossa extension. Case report. BURAK SADE, RICHARD A. PRAYSON, AND JOUNG H. LEE 904

Rare giant cell ependymoma in an octogenarian. Case report and review of the literature. PATRICK B. COOPER, MATTHEW KATUS, LEON MOORES, DENNIS GEYER, JAMES G. SMIRNIOTOPOULOS, GLENN D. SANDBERG, AND ELISABETH J. RUSHING 908

Granulocytic sarcoma: an unusual complication of acute promyelocytic leukemia causing cerebellar hemorrhage. Case report. SHINTARO FUKUSHIMA, MIZUHIKO TERASAKI, YUTAKA TAJIMA, AND MINORU SHIGEMORI 912

Myeloid sarcoma with multiple lesions of the central nervous system in a patient without leukemia. Case report. GEORG WIDHALM, WOLFGANG DIETRICH, LEONHARD MÜLLAUER, BERTHOLD STREUBEL, WERNER RABITSCH, MARK R. KOTTER, ENGELBERT KNOSP, AND KARL ROESSLER 916

Using an end-to-side interposed sural nerve graft for facial nerve reinforcement after vestibular schwannoma resection. Technical note. MADJID SAMII, ANDREI KOERBEL, SAM SAFAVI-ABBASI, FEDERICO DI ROCCO, AMIR SAMII, AND ALIREZA GHARABAGHI 920

Endoscopic opening of the foramen of Magendie using transaqueductal navigation for membrane obstruction of the fourth ventricle outlets. Technical note. PIERLUIGI LONGATTI, ALESSANDRO FIORINDI, ALBERTO FELETTI, AND VITTORIO BARATTO 924

The use of waterjet dissection in endoscopic neurosurgery. Technical note. JOACHIM OERTEL, MICHAIL GEN, JOACHIM K. KRAUSS, MATTHIAS ZUMKELLER, AND MICHAEL R. GAAB 928

CASE ILLUSTRATIONS:

Abnormal enhancement on imaging studies preceding hyperperfusion syndrome. Case illustration. CHENG-HONG TOH, HO-FAI WONG, TZU-KANG LIN, AND SHU-HANG NG 932

Solitary choroid plexus tuberculoma in an adult patient. Case illustration. FRANCESCO DOGLIETTO, ENRICO MARCHESE, ALFREDO PUCA, VALERIO GAETANO VELLONE, BARBORA TIRPAKOVA, AND MAURIZIO SANGUINETTI 933

Spontaneous pneumocephalus caused by the association of pneumosinus dilatans and meningioma. Case illustration. MARTIN SCHOLSEM, FREDERIC COLLIGNON, MANUEL DEPREZ, AND DIDIER MARTIN 934

BOOK REVIEWS 935

Subject Index

36-Item Short Form Health Survey
  Surgery for large vestibular schwannomas: how patients and surgeons perceive quality of life, 205
3-tesla magnetic resonance imaging
  Three-tesla magnetic resonance imaging of the ventrolateral thalamus: a correlative anatomical description, 279
6-hydroxydopamine
  Effect of subthalamic nucleus lesions in a 6-hydroxydopamine-induced rat parkinsonian model: behavioral and biochemical studies, 284

acoustic neuroma
  Improved preservation of hearing and facial nerve function in vestibular schwannoma surgery via the retrosigmoid approach in a series of 200 patients, 527
  Surgery for large vestibular schwannomas: how patients and surgeons perceive quality of life, 205
acute disseminated encephalomyelitis
  Central brain herniation secondary to fulminant acute disseminated encephalomyelitis: implications for neurosurgical management. Case report, 472
acute promyelocytic leukemia
  Granulocytic sarcoma: an unusual complication of acute promyelocytic leukemia causing cerebellar hemorrhage. Case report, 912
adenoma
  Concurrent lymphocytic hypophysitis and pituitary adenoma. Case report and review of the literature, 309
adjuvant therapy
  Stereotactic radiosurgery as adjuvant treatment for residual solitary fibrous tumor. Case report, 775
air travel
  Commercial flight and patients with intracranial mass lesions: a caveat. Report of two cases, 627
allogeneic bone marrow transplantation
  Myeloid sarcoma with multiple lesions of the central nervous system in a patient without leukemia. Case report, 916
amygdalohippocampectomy
  Altered expression of connexin subtypes in mesial temporal lobe epilepsy in humans, 77
anaplastic astrocytoma
  Volumetric extent of resection and residual contrast enhancement on initial surgery as predictors of outcome in adult patients with hemispheric anaplastic astrocytoma, 34
aneurysm
  Blood blister–like aneurysms at nonbranching sites of the internal carotid artery, 400
  Intraoperative ventricular puncture during supraorbital craniotomy via an eyebrow incision. Technical note, 485
  Intrasaccular combination of metallic coils and Onyx liquid embolic agent for the endovascular treatment of cerebral aneurysms, 706
  Magnesium infusion for vasospasm prophylaxis after subarachnoid hemorrhage, 723
  Multislice computed tomography angiography screening for new aneurysms in patients with previously clip-treated intracranial aneurysms: feasibility, positive predictive value, and interobserver agreement, 682
  Reliability of cobalt–chromium alloy aneurysm clips after long-term implantations in patients with cerebral aneurysms, 713
  Risk of cerebral vasopasm after subarachnoid hemorrhage reduced by statin therapy: a multivariate analysis of an institutional experience, 671
  Subdural hemorrhage in the posterior fossa caused by a ruptured cavernous carotid artery aneurysm after a balloon occlusion test. Case report, 315
aneurysm clip
  Multislice computed tomography angiography screening for new aneurysms in patients with previously clip-treated intracranial aneurysms: feasibility, positive predictive value, and interobserver agreement, 682
  Reliability of cobalt–chromium alloy aneurysm clips after long-term implantations in patients with cerebral aneurysms, 713
aneurysm size
  Endovascular surgery for very small ruptured intracranial aneurysms. Technical note, 777
angiogenesis
  Gene expression and molecular changes in cerebral arteries following subarachnoid hemorrhage in the rat, 438
angiography
  Angiographically occult, progressively expanding, giant vertebral artery aneurysm. Case report, 468
angioplasty
  Outcome of carotid endarterectomy and stent insertion based on grading of carotid endarterectomy risk: a 7-year prospective study, 546
animal model
  Survival and early differentiation of human neural stem cells transplanted in a nonhuman primate model of stroke, 96
antibiotic prophylaxis
  Surgical shunt infection: significant reduction when using intraventricular and systemic antibiotic agents, 242
antibiotic therapy
  Salvage of infected craniotomy bone flaps with the wash-in, wash-out indwelling antibiotic irrigation system. Technical note and case series of 12 patients, 640
antitumor vaccination
  Evaluation of particulate systems supporting tumor cell fractions in a preventive vaccination against intracranial rat glioma, 745
apoptosis
  An accelerated senescence response to radiation in *wild-type p53* glioblastoma multiforme cells, 111
apparent diffusion coefficient
  Glioblastoma multiforme with diffusion-weighted magnetic resonance imaging characteristics mimicking primary brain lymphoma. Case report, 132

arteriovenous malformation
Radiosurgical treatment for rolandic arteriovenous malformations, 689
Recurrent late cerebral necrosis with aggressive characteristics after radiosurgical treatment of an arteriovenous malformation. Case report, 455
astrocyte
Apoptosis in human glioblastoma cells produced using embryonic stem cell-derived astrocytes expressing tumor necrosis factor-related apoptosis-inducing ligand, 88
atherosclerosis
Primary stent therapy for symptomatic intracranial atherosclerotic stenosis: 1-year follow-up angiographic and midterm clinical outcomes, 235
avulsion injury
Use of clinical signs and computed tomography myelography findings in detecting and excluding nerve root avulsion in complete brachial plexus palsy, 835

balloon angioplasty
Effects of balloon angioplasty on perfusion- and diffusion-weighted magnetic resonance imaging results and outcome in patients with cerebral vasospasm, 220
balloon catheter
Retrograde suction decompression of giant paraclinoid aneurysms using a No. 7 French balloon-containing guide catheter. Technical note, 479
balloon-assisted coil embolization
Balloon-assisted coil embolization of intracranial aneurysms: incidence, complications, and angiography results, 396
bariatric surgery
Peroneal neuropathy following successful bariatric surgery. Case report and review of the literature, 631
basal ganglia
Effect of subthalamic nucleus lesions in a 6-hydroxydopamine-induced rat parkinsonian model: behavioral and biochemical studies, 284
basilar impression
Skull base abnormalities in osteogenesis imperfecta: a cephalometric evaluation of 54 patients and 108 control volunteers, 361
basilar invagination
Skull base abnormalities in osteogenesis imperfecta: a cephalometric evaluation of 54 patients and 108 control volunteers, 361
bioabsorbable polymer
Initial clinical experience with Matrix detachable coils for the treatment of intracranial aneurysms, 192
blindness
Photophobia in a blind patient: an alternate visual pathway. Case report, 765
blisterlike aneurysm
Wrap-clipping with polytetrafluoroethylene for ruptured blisterlike aneurysms of the internal carotid artery. Technical note, 785
blood blister–like aneurysm
Blood blister–like aneurysms at nonbranching sites of the internal carotid artery, 400
blood–brain barrier
Focal disruption of the blood–brain barrier due to 260-kHz ultrasound bursts: a method for molecular imaging and targeted drug delivery, 445
Bo Sung Sim
Bo Sung Sim (1924–2001): a pioneer of neurosurgery in Korea. Historical vignette, 494
bone flap
Salvage of infected craniotomy bone flaps with the wash-in, wash-out indwelling antibiotic irrigation system. Technical note and case series of 12 patients, 640
boron neutron capture therapy
Boron neutron capture therapy for recurrent malignant meningioma. Case report, 898
brachial plexus
Quantitation of the lower subscapular nerve for potential use in neurotization procedures, 881
Use of clinical signs and computed tomography myelography findings in detecting and excluding nerve root avulsion in complete brachial plexus palsy, 835
brachial plexus avulsion
Physiological and clinical advantages of median nerve fascicle transfer to the musculocutaneous nerve following brachial plexus root avulsion injury, 830
brachytherapy
Results of a phase II trial of the GliaSite Radiation Therapy System for the treatment of newly diagnosed, resected single brain metastases, 375
brain herniation
Central brain herniation secondary to fulminant acute disseminated encephalomyelitis: implications for neurosurgical management. Case report, 472
brain injury
Effects of ethanol on limited resuscitation in a model of traumatic brain injury and hemorrhagic shock, 884
brain mapping
Motor field sensitivity for preoperative localization of motor cortex, 588
brain neoplasm
Progesterone and estrogen receptors: opposing prognostic indicators in meningiomas, 163
Prolongation of survival following depletion of $CD4^+CD25^+$ regulatory T cells in mice with experimental brain tumors, 430
brain oxygen
Conventional neurocritical care and cerebral oxygenation after traumatic brain injury, 568
Brain Team
Personal recollections of Walter E. Dandy and his Brain Team. Historical vignette, 487
brain tumor
Comparison between neuroimaging classifications and histopathological diagnoses using an international multicenter brain tumor magnetic resonance imaging database, 6
brainstem
Gamma Knife surgery for metastatic brainstem tumors, 213

Ca^{++} channel
Involvement of phospholipase C in endothelin 1-induced stimulation of Ca^{++} channels and basilar artery contraction in rabbits, 288
cadaver dissection
Neuroanatomy and cadaver dissection in Italy: history, medicolegal issues, and neurosurgical perspectives, Historical vignette, 789
calvaria
Dural involvement in primary extradural meningiomas of the cranial vault, 51
cancer
Gamma Knife surgery for metastatic brainstem tumors, 213

carboplatin
Phase II study of nimustine, carboplatin, vincristine, and interferon-β with radiotherapy for glioblastoma multiforme: experience of the Kyoto Neuro-Oncology Group, 385
cardiac apical ballooning
Tako-tsubo cardiomyopathy in aneurysmal subarachnoid hemorrhage: an underappreciated ventricular dysfunction, 264
cardiac function
Prospective analysis of prevalence, distribution, and rate of recovery of left ventricular systolic dysfunction in patients with subarachnoid hemorrhage, 15
carotid artery stenosis
Hemichorea due to hemodynamic ischemia associated with extracranial carotid artery stenosis. Report of two cases, 142
carotid endarterectomy
Hemichorea due to hemodynamic ischemia associated with extracranial carotid artery stenosis. Report of two cases, 142
carotid stenosis
Outcome of carotid endarterectomy and stent insertion based on grading of carotid endarterectomy risk: a 7-year prospective study, 546
catecholamine-induced cardiac failure
Tako-tsubo cardiomyopathy: reversible heart failure with favorable outcome in patients with intracerebral hemorrhage. Case report, 465
cavernous angioma
Cavernous angiomas within the internal auditory canal, 581
cavernous carotid artery
Subdural hemorrhage in the posterior fossa caused by a ruptured cavernous carotid artery aneurysm after a balloon occlusion test. Case report, 315
cavernous sinus
Decompression of cavernous sinus meningioma for preservation and improvement of cranial nerve function. Technical note, 148
$CD4^+CD25^+$ T cells
Prolongation of survival following depletion of $CD4^+CD25^+$ regulatory T cells in mice with experimental brain tumors, 430
CD45
Concurrent lymphocytic hypophysitis and pituitary adenoma. Case report and review of the literature, 309
Cdc42
Functions of G protein-coupled receptor kinase interacting protein 1 in human neuronal (NT2N) cells, 103
cell culture
Establishing tumor cell lines from aggressive telomerase-positive chordomas of the skull base. Technical note, 482
cephalometrics
Skull base abnormalities in osteogenesis imperfecta: a cephalometric evaluation of 54 patients and 108 control volunteers, 361
cerebellar angioma
Tako-tsubo cardiomyopathy: reversible heart failure with favorable outcome in patients with intracerebral hemorrhage. Case report, 465
cerebellopontine angle
Primary cerebellopontine angle craniopharyngioma in a patient with Gardner syndrome. Case report and review of the literature, 330
Vascular complications of vestibular schwannoma surgery: a comparison of the suboccipital retrosigmoid and translabyrinthine approaches, 200
cerebellum
Fourth ventricle rosette-forming glioneuronal tumor. Case report, 129
Granulocytic sarcoma: an unusual complication of acute promyelocytic leukemia causing cerebellar hemorrhage. Case report, 912
cerebral aneurysm
Contribution of endovascular therapy to the management of poor-grade aneurysmal subarachnoid hemorrhage: clinical and angiographic outcomes, 664
Initial clinical experience with Matrix detachable coils for the treatment of intracranial aneurysms, 192
Monitoring of muscle motor evoked potentials during cerebral aneurysm surgery: intraoperative changes and postoperative outcome, 675
cerebral blood flow
Hemichorea due to hemodynamic ischemia associated with extracranial carotid artery stenosis. Report of two cases, 142
cerebral edema
Commercial flight and patients with intracranial mass lesions: a caveat. Report of two cases, 627
cerebral metastasis
Gamma Knife surgery for metastatic brain tumors from renal cell carcinoma, 555
cerebral revascularization
Expanded polytetrafluoroethylene graft for bypass surgery using the excimer laser–assisted nonocclusive anastomosis technique, 758
Treatment of vertebral artery aneurysms with transposition of the posterior inferior cerebellar artery to the vertebral artery combined with parent artery occlusion. Technical note, 781
cerebral vasospasm
Effects of balloon angioplasty on perfusion- and diffusion-weighted magnetic resonance imaging results and outcome in patients with cerebral vasospasm, 220
Risk of cerebral vasopasm after subarachnoid hemorrhage reduced by statin therapy: a multivariate analysis of an institutional experience, 671
cerebrospinal fluid leak
Effectiveness and handling characteristics of a three-layer polymer dura substitute: a prospective multicenter clinical study, 853
cerebrospinal fluid
Diagnostic method for differentiating external hydrocephalus from simple subdural hygroma, 65
Intraoperative ventricular puncture during supraorbital craniotomy via an eyebrow incision. Technical note, 485
Spontaneous resolution of syringomyelia and Chiari malformation Type I in a patient with cerebrospinal fluid otorrhea. Case report, 769
cerebrospinal fluid shunt
Shunts in normal-pressure hydrocephalus: do we place too many or too few? 815
Surgical shunt infection: significant reduction when using intraventricular and systemic antibiotic agents, 242
charged-particle radiotherapy
Sarcomatous transformation of clival chordoma after charged-particle radiotherapy. Report of two cases, 136
chemotherapy
Long-term response of pituitary carcinoma to temozolomide. Report of two cases, 621
Myeloid sarcoma with multiple lesions of the central nervous system in a patient without leukemia. Case report, 916
Phase II study of nimustine, carboplatin, vincristine, and interferon-β with radiotherapy for glioblastoma multiforme: experience of the Kyoto Neuro-Oncology Group, 385

Chiari malformation
Spontaneous resolution of syringomyelia and Chiari malformation Type I in a patient with cerebrospinal fluid otorrhea. Case report, 769
chordoma
Establishing tumor cell lines from aggressive telomerase-positive chordomas of the skull base. Technical note, 482
Sarcomatous transformation of clival chordoma after charged-particle radiotherapy. Report of two cases, 136
choroid plexus
Solitary choroid plexus tuberculoma in an adult patient. Case illustration, 933
chronic pain
Neurostimulation for chronic noncancer pain: an evaluation of the clinical evidence and recommendations for future trial designs, 175
clip application
Reliability of cobalt–chromium alloy aneurysm clips after long-term implantations in patients with cerebral aneurysms, 713
Three-dimensional rotational angiography guidance for aneurysm surgery, 406
clip occlusion
Wrap-clipping with polytetrafluoroethylene for ruptured blister-like aneurysms of the internal carotid artery. Technical note, 785
clivus
Anatomical analysis of transoral surgical approaches to the clivus, 301
coil embolization
Balloon-assisted coil embolization of intracranial aneurysms: incidence, complications, and angiography results, 396
Intrasaccular combination of metallic coils and Onyx liquid embolic agent for the endovascular treatment of cerebral aneurysms, 706
colloid cyst
Endoscopic resection of solid intraventricular brain tumors, 271
complement system
Preclinical evaluation of the neuroprotective effect of soluble complement receptor Type 1 in a nonhuman primate model of reperfused stroke, 595
complication
Balloon-assisted coil embolization of intracranial aneurysms: incidence, complications, and angiography results, 396
Vascular complications of vestibular schwannoma surgery: a comparison of the suboccipital retrosigmoid and translabyrinthine approaches, 200
computed tomography
Use of clinical signs and computed tomography myelography findings in detecting and excluding nerve root avulsion in complete brachial plexus palsy, 835
computed tomography angiography
Multislice computed tomography angiography screening for new aneurysms in patients with previously clip-treated intracranial aneurysms: feasibility, positive predictive value, and interobserver agreement, 682
controlled-release polymer
Lysis of intracerebral hematoma with stereotactically implanted tissue plasminogen activator polymers in a rabbit model, 424
conventional care
Conventional neurocritical care and cerebral oxygenation after traumatic brain injury, 568
cost-effectiveness
Screening tests for normal-pressure hydrocephalus: sensitivity, specificity, and cost, 823
cranial nerve
Jugular tubercle: morphometric analysis and surgical significance, 753
craniopharyngioma
Primary cerebellopontine angle craniopharyngioma in a patient with Gardner syndrome. Case report and review of the literature, 330
craniotomy
Salvage of infected craniotomy bone flaps with the wash-in, wash-out indwelling antibiotic irrigation system. Technical note and case series of 12 patients, 640
cynomolgus monkey
Survival and early differentiation of human neural stem cells transplanted in a nonhuman primate model of stroke, 96
cyst formation
Microhemorrhage, a possible mechanism for cyst formation in vestibular schwannomas, 576
cystic vestibular schwannoma
Microhemorrhage, a possible mechanism for cyst formation in vestibular schwannomas, 576
cytogenetics
Progesterone and estrogen receptors: opposing prognostic indicators in meningiomas, 163

de novo tumor
Genetic profiling of a distant second glioblastoma multiforme after radiotherapy: recurrence or second primary tumor? 739
decision analysis
Shunts in normal-pressure hydrocephalus: do we place too many or too few? 815
decompressive craniectomy
Central brain herniation secondary to fulminant acute disseminated encephalomyelitis: implications for neurosurgical management. Case report, 472
deep brain stimulation
Neurostimulation for chronic noncancer pain: an evaluation of the clinical evidence and recommendations for future trial designs, 175
Use of surface electromyography to assess and select patients with idiopathic dystonia for bilateral pallidal stimulation, 21
dendritic cell
Cellular immunity of patients with malignant glioma: prerequisites for dendritic cell vaccination immunotherapy, 41
depth electrode
In vivo accuracy of image guidance performed using optical tracking and optimized registration, 561
differential diagnosis
Cavernous angiomas within the internal auditory canal, 581
diffusion-weighted imaging
Effects of balloon angioplasty on perfusion- and diffusion-weighted magnetic resonance imaging results and outcome in patients with cerebral vasospasm, 220
Outcome of carotid endarterectomy and stent insertion based on grading of carotid endarterectomy risk: a 7-year prospective study, 546
diffusion-weighted magnetic resonance imaging
Glioblastoma multiforme with diffusion-weighted magnetic resonance imaging characteristics mimicking primary brain lymphoma. Case report, 132
direct cortical stimulation
Monitoring of muscle motor evoked potentials during cerebral aneurysm surgery: intraoperative changes and postoperative outcome, 675

drug delivery system
Focal disruption of the blood–brain barrier due to 260-kHz ultrasound bursts: a method for molecular imaging and targeted drug delivery, 445
dumbbell-shaped tumor
Resection of benign sciatic notch dumbbell-shaped tumors, 873
dura mater
Dural involvement in primary extradural meningiomas of the cranial vault, 51
dural arteriovenous fistula
Percutaneous transvenous embolization of a dural arteriovenous fistula through a mastoid emissary vein. Technical note, 636
dural sinus
Results of attempted radical tumor removal and venous repair in 100 consecutive meningiomas involving the major dural sinuses, 514
dural substitute
Effectiveness and handling characteristics of a three-layer polymer dura substitute: a prospective multicenter clinical study, 853
duraplasty
Effectiveness and handling characteristics of a three-layer polymer dura substitute: a prospective multicenter clinical study, 853
dysembryoplastic neuroepithelial tumor
Fourth ventricle rosette-forming glioneuronal tumor. Case report, 129
dystonia
Use of surface electromyography to assess and select patients with idiopathic dystonia for bilateral pallidal stimulation, 21

echocardiography
Prospective analysis of prevalence, distribution, and rate of recovery of left ventricular systolic dysfunction in patients with subarachnoid hemorrhage, 15
ectopic meningioma
Dural involvement in primary extradural meningiomas of the cranial vault, 51
electrical stimulation
Long-term electrical stimulation-induced inhibition of partial epilepsy. Case report, 894
Split facial nerve course in vestibular schwannomas, 698
electrode implantation
In vivo accuracy of image guidance performed using optical tracking and optimized registration, 561
electromagnetic field
Use of a static magnetic field to promote recovery after peripheral nerve injury, 610
embolic agent
Intrasaccular combination of metallic coils and Onyx liquid embolic agent for the endovascular treatment of cerebral aneurysms, 706
embolization
Contribution of endovascular therapy to the management of poor-grade aneurysmal subarachnoid hemorrhage: clinical and angiographic outcomes, 664
Evaluation, management, and long-term follow up of vein of Galen malformations, 26
Initial clinical experience with Matrix detachable coils for the treatment of intracranial aneurysms, 192
embryonic stem cell
Apoptosis in human glioblastoma cells produced using embryonic stem cell-derived astrocytes expressing tumor necrosis factor-related apoptosis-inducing ligand, 88
emergency care
Meeting the challenges of neurosurgery. The 2006 presidential address, 807
endarterectomy
Outcome of carotid endarterectomy and stent insertion based on grading of carotid endarterectomy risk: a 7-year prospective study, 546
endoscope
Endoscopic resection of solid intraventricular brain tumors, 271
endothelial nitric oxide synthase gene
Using *endothelial nitric oxide synthase* gene polymorphisms to identify intracranial aneurysms more prone to rupture in Japanese patients, 717
endothelin 1
Involvement of phospholipase C in endothelin 1-induced stimulation of Ca^{++} channels and basilar artery contraction in rabbits, 288
endovascular embolization
Percutaneous transvenous embolization of a dural arteriovenous fistula through a mastoid emissary vein. Technical note, 636
endovascular occlusion
Intrasaccular combination of metallic coils and Onyx liquid embolic agent for the endovascular treatment of cerebral aneurysms, 706
endovascular surgery
Endovascular surgery for very small ruptured intracranial aneurysms. Technical note, 777
Meeting the challenges of neurosurgery. The 2006 presidential address, 807
endovascular therapy
Contribution of endovascular therapy to the management of poor-grade aneurysmal subarachnoid hemorrhage: clinical and angiographic outcomes, 664
end-to-side nerve repair
Using an end-to-side interposed sural nerve graft for facial nerve reinforcement after vestibular schwannoma resection. Technical note, 920
ependymoma
Ependymoma of the pituitary fossa. Case report and review of the literature, 616
estrogen receptor
Progesterone and estrogen receptors: opposing prognostic indicators in meningiomas, 163
ethanol
Effects of ethanol on limited resuscitation in a model of traumatic brain injury and hemorrhagic shock, 884
excimer laser–assisted nonocclusive anastomosis
Expanded polytetrafluoroethylene graft for bypass surgery using the excimer laser–assisted nonocclusive anastomosis technique, 758
expanded polytetrafluoroethylene
Expanded polytetrafluoroethylene graft for bypass surgery using the excimer laser–assisted nonocclusive anastomosis technique, 758
expanding giant aneurysm
Angiographically occult, progressively expanding, giant vertebral artery aneurysm. Case report, 468
extent of resection
Volumetric extent of resection and residual contrast enhancement on initial surgery as predictors of outcome in adult patients with hemispheric anaplastic astrocytoma, 34
external hydrocephalus
Diagnostic method for differentiating external hydrocephalus from simple subdural hygroma, 65

external ventricular drain
Influence of intraventricular hemorrhage and occlusive hydrocephalus on the long-term outcome of treated patients with basal ganglia hemorrhage: a case-control study, 412
Very low pressure hydrocephalus. Report of two cases, 475
eyebrow incision
Intraoperative ventricular puncture during supraorbital craniotomy via an eyebrow incision. Technical note, 485

facial function
Improved preservation of hearing and facial nerve function in vestibular schwannoma surgery via the retrosigmoid approach in a series of 200 patients, 527
facial nerve
Cavernous angiomas within the internal auditory canal, 581
Split facial nerve course in vestibular schwannomas, 698
Using an end-to-side interposed sural nerve graft for facial nerve reinforcement after vestibular schwannoma resection. Technical note, 920
facial pain
Does dose rate affect efficacy? The outcomes of 256 Gamma Knife surgery procedures for trigeminal neuralgia and other types of facial pain as they relate to the half-life of cobalt, 730
factor V Leiden mutation
Postoperative dural sinus thrombosis in a patient in a hypercoagulable state. Case report, 772
far-lateral approach
Jugular tubercle: morphometric analysis and surgical significance, 753
fiber-dissection technique
Optic radiations: a microsurgical anatomical study, 294
FK506
Peripheral nerve regeneration through allografts compared with autografts in FK506-treated monkeys, 602
foot drop
Peroneal neuropathy following successful bariatric surgery. Case report and review of the literature, 631
foramen of Magendie
Endoscopic opening of the foramen of Magendie using transaqueductal navigation for membrane obstruction of the fourth ventricle outlets. Technical note, 924
fourth ventricle
Fourth ventricle rosette-forming glioneuronal tumor. Case report, 129
fourth ventricle surgery
Endoscopic opening of the foramen of Magendie using transaqueductal navigation for membrane obstruction of the fourth ventricle outlets. Technical note, 924
frameless stereotaxy
In vivo accuracy of image guidance performed using optical tracking and optimized registration, 561
frontal horn index
Diagnostic method for differentiating external hydrocephalus from simple subdural hygroma, 65
functional localization
Motor field sensitivity for preoperative localization of motor cortex, 588
fusiform aneurysm
Spontaneous thrombosis and resorption of a giant fusiform A_2 aneurysm. Case illustration, 788

G protein–coupled receptor kinase interacting protein 1
Functions of G protein-coupled receptor kinase interacting protein 1 in human neuronal (NT2N) cells, 103

Gamma Knife
Gamma Knife surgery for metastatic brainstem tumors, 213
Gamma Knife surgery-induced meningioma. Report of two cases and review of the literature, 325
Gamma Knife surgery
Does dose rate affect efficacy? The outcomes of 256 Gamma Knife surgery procedures for trigeminal neuralgia and other types of facial pain as they relate to the half-life of cobalt, 730
Gamma Knife surgery for metastatic brain tumors from renal cell carcinoma, 555
gap junction
Altered expression of connexin subtypes in mesial temporal lobe epilepsy in humans, 77
Gardner syndrome
Primary cerebellopontine angle craniopharyngioma in a patient with Gardner syndrome. Case report and review of the literature, 330
gene deletion
Oligodendroglioma of the pineal region. Case report, 461
gene expression
Gene expression and molecular changes in cerebral arteries following subarachnoid hemorrhage in the rat, 438
gene therapy
Apoptosis in human glioblastoma cells produced using embryonic stem cell-derived astrocytes expressing tumor necrosis factor-related apoptosis-inducing ligand, 88
genetic polymorphism
Using *endothelial nitric oxide synthase* gene polymorphisms to identify intracranial aneurysms more prone to rupture in Japanese patients, 717
genetic profiling
Genetic profiling of a distant second glioblastoma multiforme after radiotherapy: recurrence or second primary tumor? 739
giant cell ependymoma
Rare giant cell ependymoma in an octogenarian. Case report and review of the literature, 908
giant paraclinoid aneurysm
Retrograde suction decompression of giant paraclinoid aneurysms using a No. 7 French balloon-containing guide catheter. Technical note, 479
GliaSite
Results of a phase II trial of the GliaSite Radiation Therapy System for the treatment of newly diagnosed, resected single brain metastases, 375
glioblastoma multiforme
An accelerated senescence response to radiation in *wild-type p53* glioblastoma multiforme cells, 111
Glioblastoma multiforme with diffusion-weighted magnetic resonance imaging characteristics mimicking primary brain lymphoma. Case report, 132
Phase II study of nimustine, carboplatin, vincristine, and interferon-β with radiotherapy for glioblastoma multiforme: experience of the Kyoto Neuro-Oncology Group, 385

glioma
Cellular immunity of patients with malignant glioma: prerequisites for dendritic cell vaccination immunotherapy, 41
Evaluation of particulate systems supporting tumor cell fractions in a preventive vaccination against intracranial rat glioma, 745
glioneuronal tumor
Fourth ventricle rosette-forming glioneuronal tumor. Case report, 129
gliosarcoma
Gliosarcoma with infratemporal fossa extension. Case report, 904

globus pallidus internus
Use of surface electromyography to assess and select patients with idiopathic dystonia for bilateral pallidal stimulation, 21
granulocytic sarcoma
Granulocytic sarcoma: an unusual complication of acute promyelocytic leukemia causing cerebellar hemorrhage. Case report, 912
growth hormone
Systemic metabolic effects of combined insulin-like growth factor-I and growth hormone therapy in patients who have sustained acute traumatic brain injury, 843
growth–associated protein–43
Functions of G protein-coupled receptor kinase interacting protein 1 in human neuronal (NT2N) cells, 103
Guglielmi detachable coil
Endovascular surgery for very small ruptured intracranial aneurysms. Technical note, 777

hearing
Improved preservation of hearing and facial nerve function in vestibular schwannoma surgery via the retrosigmoid approach in a series of 200 patients, 527
hemangioblastoma
Long-term natural history of hemangioblastomas in patients with von Hippel–Lindau disease: implications for treatment, 248
Metastases to hemangioblastomas in von Hippel–Lindau disease, 256
hemichorea
Hemichorea due to hemodynamic ischemia associated with extracranial carotid artery stenosis. Report of two cases, 142
hemorrhage
Effects of ethanol on limited resuscitation in a model of traumatic brain injury and hemorrhagic shock, 884
hemorrhagic stroke
Role of recombinant activated factor VII in neurosurgery: hope or hype? 859
hemostasis
Role of recombinant activated factor VII in neurosurgery: hope or hype? 859
heparin
Postoperative dural sinus thrombosis in a patient in a hypercoagulable state. Case report, 772
hippocampus
Altered expression of connexin subtypes in mesial temporal lobe epilepsy in humans, 77
history of neurosurgery
Bo Sung Sim (1924–2001): a pioneer of neurosurgery in Korea. Historical vignette, 494
Neuroanatomy and cadaver dissection in Italy: history, medicolegal issues, and neurosurgical perspectives. Historical vignette, 789
hydrocephalus
Accurate placement of the distal end of a ventriculoatrial shunt with the aid of real-time transesophageal echocardiography. Technical note, 153
Endoscopic opening of the foramen of Magendie using transaqueductal navigation for membrane obstruction of the fourth ventricle outlets. Technical note, 924
Influence of intraventricular hemorrhage and occlusive hydrocephalus on the long-term outcome of treated patients with basal ganglia hemorrhage: a case-control study, 412
Minimally invasive implantation of the peritoneal catheter in ventriculoperitoneal shunt placement for hydrocephalus: analysis of data in 151 consecutive adult patients, 869
Surgical shunt infection: significant reduction when using intraventricular and systemic antibiotic agents, 242
hyperperfusion
Abnormal enhancement on imaging studies preceding hyperperfusion syndrome. Case illustration, 932

image-guided surgery
Three-dimensional rotational angiography guidance for aneurysm surgery, 406
imaging-guided surgery
In vivo accuracy of image guidance performed using optical tracking and optimized registration, 561
immunotherapy
Cellular immunity of patients with malignant glioma: prerequisites for dendritic cell vaccination immunotherapy, 41
Prolongation of survival following depletion of $CD4^+CD25^+$ regulatory T cells in mice with experimental brain tumors, 430
infection
Salvage of infected craniotomy bone flaps with the wash-in, wash-out indwelling antibiotic irrigation system. Technical note and case series of 12 patients, 640
inflammation
Gene expression and molecular changes in cerebral arteries following subarachnoid hemorrhage in the rat, 438
Risk of cerebral vasopasm after subarachnoid hemorrhage reduced by statin therapy: a multivariate analysis of an institutional experience, 671
infratemporal fossa
Gliosarcoma with infratemporal fossa extension. Case report, 904
insulin-like growth factor
Systemic metabolic effects of combined insulin-like growth factor-I and growth hormone therapy in patients who have sustained acute traumatic brain injury, 843
interferon-β
Phase II study of nimustine, carboplatin, vincristine, and interferon-β with radiotherapy for glioblastoma multiforme: experience of the Kyoto Neuro-Oncology Group, 385
internal auditory canal
Cavernous angiomas within the internal auditory canal, 581
internal carotid artery
Blood blister–like aneurysms at nonbranching sites of the internal carotid artery, 400
Wrap-clipping with polytetrafluoroethylene for ruptured blister-like aneurysms of the internal carotid artery. Technical note, 785
interventional neuroradiology
Evaluation, management, and long-term follow up of vein of Galen malformations, 26
intracerebral hematoma
Lysis of intracerebral hematoma with stereotactically implanted tissue plasminogen activator polymers in a rabbit model, 424
intracerebral hemorrhage
Lysis of intracerebral hematoma with stereotactically implanted tissue plasminogen activator polymers in a rabbit model, 424
Role of recombinant activated factor VII in neurosurgery: hope or hype? 859
intracranial aneurysm
Balloon-assisted coil embolization of intracranial aneurysms: incidence, complications, and angiography results, 396
Endovascular surgery for very small ruptured intracranial aneurysms. Technical note, 777

The role of *MMP-2* and *MMP-9* polymorphisms in sporadic intracranial aneurysms, 418
Three-dimensional rotational angiography guidance for aneurysm surgery, 406
Using *endothelial nitric oxide synthase* gene polymorphisms to identify intracranial aneurysms more prone to rupture in Japanese patients, 717
intracranial lesion
Primary stent therapy for symptomatic intracranial atherosclerotic stenosis: 1-year follow-up angiographic and midterm clinical outcomes, 235
intracranial pressure
Commercial flight and patients with intracranial mass lesions: a caveat. Report of two cases, 627
Conventional neurocritical care and cerebral oxygenation after traumatic brain injury, 568
intracranial stenosis
Primary stent therapy for symptomatic intracranial atherosclerotic stenosis: 1-year follow-up angiographic and midterm clinical outcomes, 235
intraoperative electromyography
Split facial nerve course in vestibular schwannomas, 698
intraoperative monitoring
Monitoring of muscle motor evoked potentials during cerebral aneurysm surgery: intraoperative changes and postoperative outcome, 675
intrathecal antibiotic therapy
Spontaneous bacterial peritonitis causing *Serratia marcescens* and *Proteus mirabilis* ventriculoperitoneal shunt infection. Case report, 320
intraventricular antibiotic medication
Surgical shunt infection: significant reduction when using intraventricular and systemic antibiotic agents, 242
intraventricular hemorrhage
Influence of intraventricular hemorrhage and occlusive hydrocephalus on the long-term outcome of treated patients with basal ganglia hemorrhage: a case-control study, 412
intraventricular hemorrhage
Tako-tsubo cardiomyopathy: reversible heart failure with favorable outcome in patients with intracerebral hemorrhage. Case report, 465
intraventricular tumor
Endoscopic resection of solid intraventricular brain tumors, 271
irradiated tumor cell
Evaluation of particulate systems supporting tumor cell fractions in a preventive vaccination against intracranial rat glioma, 745
irrigation
Salvage of infected craniotomy bone flaps with the wash-in, wash-out indwelling antibiotic irrigation system. Technical note and case series of 12 patients, 640

jugular bulb
Jugular tubercle: morphometric analysis and surgical significance, 753
jugular foramen
Jugular tubercle: morphometric analysis and surgical significance, 753

kainic acid
Effect of subthalamic nucleus lesions in a 6-hydroxydopamine-induced rat parkinsonian model: behavioral and biochemical studies, 284
Korean Neurosurgical Society
Bo Sung Sim (1924–2001): a pioneer of neurosurgery in Korea. Historical vignette, 494

laparoscopy
Minimally invasive implantation of the peritoneal catheter in ventriculoperitoneal shunt placement for hydrocephalus: analysis of data in 151 consecutive adult patients, 869
lateral ventricle
Optic radiations: a microsurgical anatomical study, 294
Le Fort I osteotomy
Anatomical analysis of transoral surgical approaches to the clivus, 301
linear accelerator
Linear accelerator radiosurgery for vestibular schwannomas, 657
Radiosurgical treatment for rolandic arteriovenous malformations, 689
local tumor control
Results of a phase II trial of the GliaSite Radiation Therapy System for the treatment of newly diagnosed, resected single brain metastases, 375
localization-related epilepsy
Long-term electrical stimulation-induced inhibition of partial epilepsy. Case report, 894
location
Meningothelioma as the predominant histological subtype of midline skull base and spinal meningioma, 60
long-term remission
Myeloid sarcoma with multiple lesions of the central nervous system in a patient without leukemia. Case report, 916
lower subscapular nerve
Quantitation of the lower subscapular nerve for potential use in neurotization procedures, 881
low-pressure hydrocephalus
Very low pressure hydrocephalus. Report of two cases, 475
lumbar drainage
Screening tests for normal-pressure hydrocephalus: sensitivity, specificity, and cost, 823
lupus anticoagulant
Postoperative dural sinus thrombosis in a patient in a hypercoagulable state. Case report, 772
lymphocytic hypophysitis
Concurrent lymphocytic hypophysitis and pituitary adenoma. Case report and review of the literature, 309

Macaca fascicularis
Peripheral nerve regeneration through allografts compared with autografts in FK506-treated monkeys, 602
magnetic resonance angiography
Magnetic resonance angiography and clinical evaluation of third nerve palsies and posterior communicating artery aneurysms, 228
magnetic resonance imaging
Abnormal enhancement on imaging studies preceding hyperperfusion syndrome. Case illustration, 932
Comparison between neuroimaging classifications and histopathological diagnoses using an international multicenter brain tumor magnetic resonance imaging database, 6
Focal disruption of the blood–brain barrier due to 260-kHz ultrasound bursts: a method for molecular imaging and targeted drug delivery, 445

magnetic resonance spectroscopy
Glioblastoma multiforme with diffusion-weighted magnetic resonance imaging characteristics mimicking primary brain lymphoma. Case report, 132
magnetoencephalography
Motor field sensitivity for preoperative localization of motor cortex, 588
malignant glioma
Apoptosis in human glioblastoma cells produced using embryonic stem cell-derived astrocytes expressing tumor necrosis factor-related apoptosis-inducing ligand, 88
Participation of an abnormality in the transforming growth factor-β signaling pathway in resistance of malignant glioma cells to growth inhibition induced by that factor, 119
malignant meningioma
Boron neutron capture therapy for recurrent malignant meningioma. Case report, 898
mandibulotomy
Anatomical analysis of transoral surgical approaches to the clivus, 301
mastoid emissary vein
Percutaneous transvenous embolization of a dural arteriovenous fistula through a mastoid emissary vein. Technical note, 636
Matrix detachable coil
Initial clinical experience with Matrix detachable coils for the treatment of intracranial aneurysms, 192
matrix metalloproteinase
The role of *MMP-2* and *MMP-9* polymorphisms in sporadic intracranial aneurysms, 418
maxillotomy
Anatomical analysis of transoral surgical approaches to the clivus, 301
measles encephalitis
Long-term electrical stimulation-induced inhibition of partial epilepsy. Case report, 894
median nerve
Physiological and clinical advantages of median nerve fascicle transfer to the musculocutaneous nerve following brachial plexus root avulsion injury, 830
meningioma
Decompression of cavernous sinus meningioma for preservation and improvement of cranial nerve function. Technical note, 148
Dural involvement in primary extradural meningiomas of the cranial vault, 51
Gamma Knife surgery-induced meningioma. Report of two cases and review of the literature, 325
Indications for surgery in patients with asymptomatic meningiomas based on an extensive experience, 538
Meningothelioma as the predominant histological subtype of midline skull base and spinal meningioma, 60
Oncocytic meningiomas: cases with benign histopathological features and a favorable clinical course, 736
Progesterone and estrogen receptors: opposing prognostic indicators in meningiomas, 163
Results of attempted radical tumor removal and venous repair in 100 consecutive meningiomas involving the major dural sinuses, 514
Spontaneous pneumocephalus caused by the association of pneumosinus dilatans and meningioma. Case illustration, 934
meningothelial
Meningothelioma as the predominant histological subtype of midline skull base and spinal meningioma, 60
metastasis
Gamma Knife surgery for metastatic brainstem tumors, 213
Metastases to hemangioblastomas in von Hippel–Lindau disease, 256
Results of a phase II trial of the GliaSite Radiation Therapy System for the treatment of newly diagnosed, resected single brain metastases, 375
microhemorrhage
Microhemorrhage, a possible mechanism for cyst formation in vestibular schwannomas, 576
minimally invasive surgery
Endoscopic resection of solid intraventricular brain tumors, 271
motor cortex
Long-term electrical stimulation-induced inhibition of partial epilepsy. Case report, 894
motor cortex stimulation
Neurostimulation for chronic noncancer pain: an evaluation of the clinical evidence and recommendations for future trial designs, 175
motor evoked potential
Monitoring of muscle motor evoked potentials during cerebral aneurysm surgery: intraoperative changes and postoperative outcome, 675
motor field
Motor field sensitivity for preoperative localization of motor cortex, 588
motor neuron
Peripheral nerve regeneration through allografts compared with autografts in FK506-treated monkeys, 602
motor outcome
Monitoring of muscle motor evoked potentials during cerebral aneurysm surgery: intraoperative changes and postoperative outcome, 675
movement-evoked field
Motor field sensitivity for preoperative localization of motor cortex, 588
myelography
Use of clinical signs and computed tomography myelography findings in detecting and excluding nerve root avulsion in complete brachial plexus palsy, 835
myeloid sarcoma
Myeloid sarcoma with multiple lesions of the central nervous system in a patient without leukemia. Case report, 916

natural course of disease
Indications for surgery in patients with asymptomatic meningiomas based on an extensive experience, 538
natural history
Long-term natural history of hemangioblastomas in patients with von Hippel–Lindau disease: implications for treatment, 248
nerve allograft
Peripheral nerve regeneration through allografts compared with autografts in FK506-treated monkeys, 602
nerve injury
Physiological and clinical advantages of median nerve fascicle transfer to the musculocutaneous nerve following brachial plexus root avulsion injury, 830
Quantitation of the lower subscapular nerve for potential use in neurotization procedures, 881
nerve regeneration
Peripheral nerve regeneration through allografts compared with autografts in FK506-treated monkeys, 602
Use of a static magnetic field to promote recovery after peripheral nerve injury, 610

nerve transfer
Physiological and clinical advantages of median nerve fascicle transfer to the musculocutaneous nerve following brachial plexus root avulsion injury, 830
neuroanatomy
Neuroanatomy and cadaver dissection in Italy: history, medicolegal issues, and neurosurgical perspectives. Historical vignette, 789
neurocyte
Fourth ventricle rosette-forming glioneuronal tumor. Case report, 129
neuroendoscopy
Endoscopic opening of the foramen of Magendie using transaqueductal navigation for membrane obstruction of the fourth ventricle outlets. Technical note, 924
The use of waterjet dissection in endoscopic neurosurgery. Technical note, 928
neurofibromatosis
Resection of benign sciatic notch dumbbell-shaped tumors, 873
neurogenic stunned myocardium
Tako-tsubo cardiomyopathy in aneurysmal subarachnoid hemorrhage: an underappreciated ventricular dysfunction, 264
neuroimaging
Rare giant cell ependymoma in an octogenarian. Case report and review of the literature, 908
neurophysiological monitoring
Split facial nerve course in vestibular schwannomas, 698
neuroprotection
Preclinical evaluation of the neuroprotective effect of soluble complement receptor Type 1 in a nonhuman primate model of reperfused stroke, 595
neurorrhaphy
Using an end-to-side interposed sural nerve graft for facial nerve reinforcement after vestibular schwannoma resection. Technical note, 920
neurosurgery
Role of recombinant activated factor VII in neurosurgery: hope or hype? 859
neurosurgical education
Meeting the challenges of neurosurgery. The 2006 presidential address, 807
Neuroanatomy and cadaver dissection in Italy: history, medicolegal issues, and neurosurgical perspectives, Historical vignette, 789
neurosurgical history
Personal recollections of Walter E. Dandy and his Brain Team. Historical vignette, 487
neurotization
Quantitation of the lower subscapular nerve for potential use in neurotization procedures, 881
nimustine
Phase II study of nimustine, carboplatin, vincristine, and interferon-β with radiotherapy for glioblastoma multiforme: experience of the Kyoto Neuro-Oncology Group, 385
normal-pressure hydrocephalus
Screening tests for normal-pressure hydrocephalus: sensitivity, specificity, and cost, 823
Shunts in normal-pressure hydrocephalus: do we place too many or too few? 815
NOS3
Using *endothelial nitric oxide synthase* gene polymorphisms to identify intracranial aneurysms more prone to rupture in Japanese patients, 717
NT2N cell
Functions of G protein-coupled receptor kinase interacting protein 1 in human neuronal (NT2N) cells, 103
nutrition
Systemic metabolic effects of combined insulin-like growth factor-I and growth hormone therapy in patients who have sustained acute traumatic brain injury, 843

occipital nerve stimulation
Neurostimulation for chronic noncancer pain: an evaluation of the clinical evidence and recommendations for future trial designs, 175
oligodendroglioma
Oligodendroglioma of the pineal region. Case report, 461
oncocytic meningioma
Oncocytic meningiomas: cases with benign histopathological features and a favorable clinical course, 736
oncocytic transformation
Oncocytic meningiomas: cases with benign histopathological features and a favorable clinical course, 736
ontology
Comparison between neuroimaging classifications and histopathological diagnoses using an international multicenter brain tumor magnetic resonance imaging database, 6
optic radiation
Optic radiations: a microsurgical anatomical study, 294
osteogenesis imperfecta
Skull base abnormalities in osteogenesis imperfecta: a cephalometric evaluation of 54 patients and 108 control volunteers, 361
otorrhea
Spontaneous resolution of syringomyelia and Chiari malformation Type I in a patient with cerebrospinal fluid otorrhea. Case report, 769
outcome
Influence of intraventricular hemorrhage and occlusive hydrocephalus on the long-term outcome of treated patients with basal ganglia hemorrhage: a case-control study, 412

p21
Participation of an abnormality in the transforming growth factor-β signaling pathway in resistance of malignant glioma cells to growth inhibition induced by that factor, 119
Papio anubis
Preclinical evaluation of the neuroprotective effect of soluble complement receptor Type 1 in a nonhuman primate model of reperfused stroke, 595
parasagittal meningioma
Results of attempted radical tumor removal and venous repair in 100 consecutive meningiomas involving the major dural sinuses, 514
Parkinson disease
Effect of subthalamic nucleus lesions in a 6-hydroxydopamine-induced rat parkinsonian model: behavioral and biochemical studies, 284
partial epilepsy
Subtraction ictal single-photon emission computed tomography coregistered to magnetic resonance imaging in evaluating the need for repeated epilepsy surgery, 71
particulate system
Evaluation of particulate systems supporting tumor cell fractions in a preventive vaccination against intracranial rat glioma, 745

pathogenesis
Microhemorrhage, a possible mechanism for cyst formation in vestibular schwannomas, 576
patient safety
Meeting the challenges of neurosurgery. The 2006 presidential address, 807
percutaneous transvenous therapy
Percutaneous transvenous embolization of a dural arteriovenous fistula through a mastoid emissary vein. Technical note, 636
perfusion-weighted imaging
Effects of balloon angioplasty on perfusion- and diffusion-weighted magnetic resonance imaging results and outcome in patients with cerebral vasospasm, 220
perilymphatic fistula
Ventriculoperitoneal shunt insertion for the treatment of refractory perilymphatic fistula, 1
peripheral nerve
Physiological and clinical advantages of median nerve fascicle transfer to the musculocutaneous nerve following brachial plexus root avulsion injury, 830
Quantitation of the lower subscapular nerve for potential use in neurotization procedures, 881
peritoneal catheter
Minimally invasive implantation of the peritoneal catheter in ventriculoperitoneal shunt placement for hydrocephalus: analysis of data in 151 consecutive adult patients, 869
peritonitis
Spontaneous bacterial peritonitis causing *Serratia marcescens* and *Proteus mirabilis* ventriculoperitoneal shunt infection. Case report, 320
peroneal neuropathy
Peroneal neuropathy following successful bariatric surgery. Case report and review of the literature, 631
phospholipase C
Involvement of phospholipase C in endothelin 1-induced stimulation of Ca^{++} channels and basilar artery contraction in rabbits, 288
photophobia
Photophobia in a blind patient: an alternate visual pathway. Case report, 765
physiological assessment
Use of surface electromyography to assess and select patients with idiopathic dystonia for bilateral pallidal stimulation, 21
pig
Effects of ethanol on limited resuscitation in a model of traumatic brain injury and hemorrhagic shock, 884
The use of waterjet dissection in endoscopic neurosurgery. Technical note, 928
pilocytic astrocytoma
Fourth ventricle rosette-forming glioneuronal tumor. Case report, 129
pineal gland
Oligodendroglioma of the pineal region. Case report, 461
pineal region
Oligodendroglioma of the pineal region. Case report, 461
pituitary
Concurrent lymphocytic hypophysitis and pituitary adenoma. Case report and review of the literature, 309
pituitary carcinoma
Long-term response of pituitary carcinoma to temozolomide. Report of two cases, 621
pituitary fossa
Ependymoma of the pituitary fossa. Case report and review of the literature, 616
pituitary tumor
Ependymoma of the pituitary fossa. Case report and review of the literature, 616
platybasia
Skull base abnormalities in osteogenesis imperfecta: a cephalometric evaluation of 54 patients and 108 control volunteers, 361
plexiform neurofibroma
Resection of benign sciatic notch dumbbell-shaped tumors, 873
pneumocephalus
Spontaneous pneumocephalus caused by the association of pneumosinus dilatans and meningioma. Case illustration, 934
pneumosinus dilatans
Spontaneous pneumocephalus caused by the association of pneumosinus dilatans and meningioma. Case illustration, 934
polymerase chain reaction
Solitary choroid plexus tuberculoma in an adult patient. Case illustration, 933
polymorphism genetics
The role of *MMP-2* and *MMP-9* polymorphisms in sporadic intracranial aneurysms, 418
polyposis
Primary cerebellopontine angle craniopharyngioma in a patient with Gardner syndrome. Case report and review of the literature, 330
polytetrafluoroethylene
Effectiveness and handling characteristics of a three-layer polymer dura substitute: a prospective multicenter clinical study, 853
polytetrafluoroethylene
Wrap-clipping with polytetrafluoroethylene for ruptured blister-like aneurysms of the internal carotid artery. Technical note, 785
poor grade
Contribution of endovascular therapy to the management of poor-grade aneurysmal subarachnoid hemorrhage: clinical and angiographic outcomes, 664
posterior communicating aneurysm
Magnetic resonance angiography and clinical evaluation of third nerve palsies and posterior communicating artery aneurysms, 228
posterior fossa
Rare giant cell ependymoma in an octogenarian. Case report and review of the literature, 908
posterior inferior cerebellar artery
Treatment of vertebral artery aneurysms with transposition of the posterior inferior cerebellar artery to the vertebral artery combined with parent artery occlusion. Technical note, 781
predictive value
Comparison between neuroimaging classifications and histopathological diagnoses using an international multicenter brain tumor magnetic resonance imaging database, 6
presidential address
Meeting the challenges of neurosurgery. The 2006 presidential address, 807
presurgical planning
Use of clinical signs and computed tomography myelography findings in detecting and excluding nerve root avulsion in complete brachial plexus palsy, 835
pretectal nuclei
Photophobia in a blind patient: an alternate visual pathway. Case report, 765
progesterone receptor
Progesterone and estrogen receptors: opposing prognostic indicators in meningiomas, 163

prognosis
Volumetric extent of resection and residual contrast enhancement on initial surgery as predictors of outcome in adult patients with hemispheric anaplastic astrocytoma, 34
prophylaxis
Magnesium infusion for vasospasm prophylaxis after subarachnoid hemorrhage, 723
Proteus mirabilis
Spontaneous bacterial peritonitis causing *Serratia marcescens* and *Proteus mirabilis* ventriculoperitoneal shunt infection. Case report, 320
pseudotumor cerebri
Ventriculoperitoneal shunt insertion for the treatment of refractory perilymphatic fistula, 1

quality of life
Surgery for large vestibular schwannomas: how patients and surgeons perceive quality of life, 205

rabbit
Expanded polytetrafluoroethylene graft for bypass surgery using the excimer laser–assisted nonocclusive anastomosis technique, 758
Lysis of intracerebral hematoma with stereotactically implanted tissue plasminogen activator polymers in a rabbit model, 424
radiation necrosis
Recurrent late cerebral necrosis with aggressive characteristics after radiosurgical treatment of an arteriovenous malformation. Case report, 455
radiation therapy
Decompression of cavernous sinus meningioma for preservation and improvement of cranial nerve function. Technical note, 148
radiation-induced tumor
Gamma Knife surgery-induced meningioma. Report of two cases and review of the literature, 325
radiosurgery
Boron neutron capture therapy for recurrent malignant meningioma. Case report, 898
Decompression of cavernous sinus meningioma for preservation and improvement of cranial nerve function. Technical note, 148
Gamma Knife surgery for metastatic brain tumors from renal cell carcinoma, 555
Gamma Knife surgery for metastatic brainstem tumors, 213
Linear accelerator radiosurgery for vestibular schwannomas, 657
Radiosurgical treatment for rolandic arteriovenous malformations, 689
radiotherapy
An accelerated senescence response to radiation in *wild-type p53* glioblastoma multiforme cells, 111
Myeloid sarcoma with multiple lesions of the central nervous system in a patient without leukemia. Case report, 916
rat
Effect of subthalamic nucleus lesions in a 6-hydroxydopamine-induced rat parkinsonian model: behavioral and biochemical studies, 284
Evaluation of particulate systems supporting tumor cell fractions in a preventive vaccination against intracranial rat glioma, 745
rebleeding
Contribution of endovascular therapy to the management of poor-grade aneurysmal subarachnoid hemorrhage: clinical and angiographic outcomes, 664
recombinant activated factor VII
Role of recombinant activated factor VII in neurosurgery: hope or hype? 859
recurrence
Dural involvement in primary extradural meningiomas of the cranial vault, 51
recurrent tumor
Genetic profiling of a distant second glioblastoma multiforme after radiotherapy: recurrence or second primary tumor? 739
regulatory T cells
Prolongation of survival following depletion of $CD4^+CD25^+$ regulatory T cells in mice with experimental brain tumors, 430
renal cell carcinoma
Gamma Knife surgery for metastatic brain tumors from renal cell carcinoma, 555
repeated surgery
Subtraction ictal single-photon emission computed tomography coregistered to magnetic resonance imaging in evaluating the need for repeated epilepsy surgery, 71
resorption
Spontaneous thrombosis and resorption of a giant fusiform A_2 aneurysm. Case illustration, 788
resuscitation
Effects of ethanol on limited resuscitation in a model of traumatic brain injury and hemorrhagic shock, 884
retrosigmoid approach
Improved preservation of hearing and facial nerve function in vestibular schwannoma surgery via the retrosigmoid approach in a series of 200 patients, 527
retrosigmoid approach
Vascular complications of vestibular schwannoma surgery: a comparison of the suboccipital retrosigmoid and translabyrinthine approaches, 200
risk factor
Outcome of carotid endarterectomy and stent insertion based on grading of carotid endarterectomy risk: a 7-year prospective study, 546
root avulsion
Use of clinical signs and computed tomography myelography findings in detecting and excluding nerve root avulsion in complete brachial plexus palsy, 835

sagittal sinus thrombosis
Postoperative dural sinus thrombosis in a patient in a hypercoagulable state. Case report, 772
sarcomatous transformation
Sarcomatous transformation of clival chordoma after charged-particle radiotherapy. Report of two cases, 136
sciatic notch
Resection of benign sciatic notch dumbbell-shaped tumors, 873
second glioblastoma multiforme
Genetic profiling of a distant second glioblastoma multiforme after radiotherapy: recurrence or second primary tumor? 739
seizure
Altered expression of connexin subtypes in mesial temporal lobe epilepsy in humans, 77
senescence
An accelerated senescence response to radiation in *wild-type p53* glioblastoma multiforme cells, 111
sensitivity
Comparison between neuroimaging classifications and histopathological diagnoses using an international multicenter brain tumor magnetic resonance imaging database, 6

sensorimotor cortex
Radiosurgical treatment for rolandic arteriovenous malformations, 689
septostomy
The use of waterjet dissection in endoscopic neurosurgery. Technical note, 928
Serratia marcescens
Spontaneous bacterial peritonitis causing *Serratia marcescens* and *Proteus mirabilis* ventriculoperitoneal shunt infection. Case report, 320
sex steroid
Progesterone and estrogen receptors: opposing prognostic indicators in meningiomas, 163
sheep
Use of a static magnetic field to promote recovery after peripheral nerve injury, 610
shock
Effects of ethanol on limited resuscitation in a model of traumatic brain injury and hemorrhagic shock, 884
shunt infection
Spontaneous bacterial peritonitis causing *Serratia marcescens* and *Proteus mirabilis* ventriculoperitoneal shunt infection. Case report, 320
shunt infection
Surgical shunt infection: significant reduction when using intraventricular and systemic antibiotic agents, 242
signaling pathway
Photophobia in a blind patient: an alternate visual pathway. Case report, 765
single nucleotide polymorphism
Using *endothelial nitric oxide synthase* gene polymorphisms to identify intracranial aneurysms more prone to rupture in Japanese patients, 717
Ski
Participation of an abnormality in the transforming growth factor-β signaling pathway in resistance of malignant glioma cells to growth inhibition induced by that factor, 119
skull base
Gliosarcoma with infratemporal fossa extension. Case report, 904
Meningothelioma as the predominant histological subtype of midline skull base and spinal meningioma, 60
Sarcomatous transformation of clival chordoma after charged-particle radiotherapy. Report of two cases, 136
Skull base abnormalities in osteogenesis imperfecta: a cephalometric evaluation of 54 patients and 108 control volunteers, 361
skull base neoplasm
Decompression of cavernous sinus meningioma for preservation and improvement of cranial nerve function. Technical note, 148
skull base surgery
Jugular tubercle: morphometric analysis and surgical significance, 753
skull base tumor
Establishing tumor cell lines from aggressive telomerase-positive chordomas of the skull base. Technical note, 482
skull tumor
Dural involvement in primary extradural meningiomas of the cranial vault, 51
Smad
Participation of an abnormality in the transforming growth factor-β signaling pathway in resistance of malignant glioma cells to growth inhibition induced by that factor, 119
SnoN
Participation of an abnormality in the transforming growth factor-β signaling pathway in resistance of malignant glioma cells to growth inhibition induced by that factor, 119
solitary fibrous tumor
Stereotactic radiosurgery as adjuvant treatment for residual solitary fibrous tumor. Case report, 775
specificity
Comparison between neuroimaging classifications and histopathological diagnoses using an international multicenter brain tumor magnetic resonance imaging database, 6
spinal cord stimulation
Neurostimulation for chronic noncancer pain: an evaluation of the clinical evidence and recommendations for future trial designs, 175
spine formation
Functions of G protein-coupled receptor kinase interacting protein 1 in human neuronal (NT2N) cells, 103
spontaneous resolution
Spontaneous resolution of syringomyelia and Chiari malformation Type I in a patient with cerebrospinal fluid otorrhea. Case report, 769
spontaneous thrombosis
Spontaneous thrombosis and resorption of a giant fusiform A_2 aneurysm. Case illustration, 788
statin
Risk of cerebral vasopasm after subarachnoid hemorrhage reduced by statin therapy: a multivariate analysis of an institutional experience, 671
stem cell
Survival and early differentiation of human neural stem cells transplanted in a nonhuman primate model of stroke, 96
stent
Outcome of carotid endarterectomy and stent insertion based on grading of carotid endarterectomy risk: a 7-year prospective study, 546
Primary stent therapy for symptomatic intracranial atherosclerotic stenosis: 1-year follow-up angiographic and midterm clinical outcomes, 235
stereotactic neurosurgery
Three-tesla magnetic resonance imaging of the ventrolateral thalamus: a correlative anatomical description, 279
Radiosurgical treatment for rolandic arteriovenous malformations, 689
Recurrent late cerebral necrosis with aggressive characteristics after radiosurgical treatment of an arteriovenous malformation. Case report, 455
Stereotactic radiosurgery as adjuvant treatment for residual solitary fibrous tumor. Case report, 775
stereotactic targeting
Lysis of intracerebral hematoma with stereotactically implanted tissue plasminogen activator polymers in a rabbit model, 424
stroke
Preclinical evaluation of the neuroprotective effect of soluble complement receptor Type 1 in a nonhuman primate model of reperfused stroke, 595
Survival and early differentiation of human neural stem cells transplanted in a nonhuman primate model of stroke, 96
subarachnoid hemorrhage
Blood blister–like aneurysms at nonbranching sites of the internal carotid artery, 400
Contribution of endovascular therapy to the management of poor-grade aneurysmal subarachnoid hemorrhage: clinical and angiographic outcomes, 664

Effects of balloon angioplasty on perfusion- and diffusion-weighted magnetic resonance imaging results and outcome in patients with cerebral vasospasm, 220
Endovascular surgery for very small ruptured intracranial aneurysms. Technical note, 777
Gene expression and molecular changes in cerebral arteries following subarachnoid hemorrhage in the rat, 438
Magnesium infusion for vasospasm prophylaxis after subarachnoid hemorrhage, 723
Multislice computed tomography angiography screening for new aneurysms in patients with previously clip-treated intracranial aneurysms: feasibility, positive predictive value, and interobserver agreement, 682
Prospective analysis of prevalence, distribution, and rate of recovery of left ventricular systolic dysfunction in patients with subarachnoid hemorrhage, 15
Risk of cerebral vasopasm after subarachnoid hemorrhage reduced by statin therapy: a multivariate analysis of an institutional experience, 671
Role of recombinant activated factor VII in neurosurgery: hope or hype? 859
Tako-tsubo cardiomyopathy in aneurysmal subarachnoid hemorrhage: an underappreciated ventricular dysfunction, 264
The role of *MMP-2* and *MMP-9* polymorphisms in sporadic intracranial aneurysms, 418
Using *endothelial nitric oxide synthase* gene polymorphisms to identify intracranial aneurysms more prone to rupture in Japanese patients, 717

subdural hemorrhage
Subdural hemorrhage in the posterior fossa caused by a ruptured cavernous carotid artery aneurysm after a balloon occlusion test. Case report, 315

subdural hygroma
Diagnostic method for differentiating external hydrocephalus from simple subdural hygroma, 65

subdural pressure
Diagnostic method for differentiating external hydrocephalus from simple subdural hygroma, 65

subthalamic nucleus
Effect of subthalamic nucleus lesions in a 6-hydroxydopamine-induced rat parkinsonian model: behavioral and biochemical studies, 284

suction decompression
Retrograde suction decompression of giant paraclinoid aneurysms using a No. 7 French balloon-containing guide catheter. Technical note, 479

supraorbital craniotomy
Intraoperative ventricular puncture during supraorbital craniotomy via an eyebrow incision. Technical note, 485

sural graft
Using an end-to-side interposed sural nerve graft for facial nerve reinforcement after vestibular schwannoma resection. Technical note, 920

surgery
Decompression of cavernous sinus meningioma for preservation and improvement of cranial nerve function. Technical note, 148
Indications for surgery in patients with asymptomatic meningiomas based on an extensive experience, 538

surgical treatment
Subtraction ictal single-photon emission computed tomography coregistered to magnetic resonance imaging in evaluating the need for repeated epilepsy surgery, 71

survival
Volumetric extent of resection and residual contrast enhancement on initial surgery as predictors of outcome in adult patients with hemispheric anaplastic astrocytoma, 34

syringomyelia
Spontaneous resolution of syringomyelia and Chiari malformation Type I in a patient with cerebrospinal fluid otorrhea. Case report, 769

tako-tsubo cardiomyopathy
Tako-tsubo cardiomyopathy in aneurysmal subarachnoid hemorrhage: an underappreciated ventricular dysfunction, 264
Tako-tsubo cardiomyopathy: reversible heart failure with favorable outcome in patients with intracerebral hemorrhage. Case report, 465

telomerase
Establishing tumor cell lines from aggressive telomerase-positive chordomas of the skull base. Technical note, 482

temozolomide
Long-term response of pituitary carcinoma to temozolomide. Report of two cases, 621

thalamus
Three-tesla magnetic resonance imaging of the ventrolateral thalamus: a correlative anatomical description, 279

third nerve palsy
Magnetic resonance angiography and clinical evaluation of third nerve palsies and posterior communicating artery aneurysms, 228

three-dimensional rotational angiography
Three-dimensional rotational angiography guidance for aneurysm surgery, 406

tissue plasminogen activator
Lysis of intracerebral hematoma with stereotactically implanted tissue plasminogen activator polymers in a rabbit model, 424

transcallosal approach
Postoperative dural sinus thrombosis in a patient in a hypercoagulable state. Case report, 772

transcondylar approach
Jugular tubercle: morphometric analysis and surgical significance, 753

transcranial electrical stimulation
Monitoring of muscle motor evoked potentials during cerebral aneurysm surgery: intraoperative changes and postoperative outcome, 675

transesophageal echocardiography
Accurate placement of the distal end of a ventriculoatrial shunt with the aid of real-time transesophageal echocardiography. Technical note, 153

transforming growth factor-β
Participation of an abnormality in the transforming growth factor-β signaling pathway in resistance of malignant glioma cells to growth inhibition induced by that factor, 119

translabyrinthine approach
Vascular complications of vestibular schwannoma surgery: a comparison of the suboccipital retrosigmoid and translabyrinthine approaches, 200

transoral approach
Anatomical analysis of transoral surgical approaches to the clivus, 301

transpharyngeal approach
Anatomical analysis of transoral surgical approaches to the clivus, 301

transplantation
Survival and early differentiation of human neural stem cells transplanted in a nonhuman primate model of stroke, 96

traumatic brain injury
Conventional neurocritical care and cerebral oxygenation after traumatic brain injury, 568
Systemic metabolic effects of combined insulin-like growth factor-I and growth hormone therapy in patients who have sustained acute traumatic brain injury, 843
treatment planning
Long-term natural history of hemangioblastomas in patients with von Hippel–Lindau disease: implications for treatment, 248
tremor
Three-tesla magnetic resonance imaging of the ventrolateral thalamus: a correlative anatomical description, 279
trigeminal neuralgia
Does dose rate affect efficacy? The outcomes of 256 Gamma Knife surgery procedures for trigeminal neuralgia and other types of facial pain as they relate to the half-life of cobalt, 730
trigeminal pathway
Photophobia in a blind patient: an alternate visual pathway. Case report, 765
troponin
Prospective analysis of prevalence, distribution, and rate of recovery of left ventricular systolic dysfunction in patients with subarachnoid hemorrhage, 15
tuberculoma
Solitary choroid plexus tuberculoma in an adult patient. Case illustration, 933
tuberculosis
Solitary choroid plexus tuberculoma in an adult patient. Case illustration, 933
tumor necrosis factor–related apoptosis-inducing ligand
Apoptosis in human glioblastoma cells produced using embryonic stem cell-derived astrocytes expressing tumor necrosis factor-related apoptosis-inducing ligand, 88
tumor recurrence
Boron neutron capture therapy for recurrent malignant meningioma. Case report, 898
Progesterone and estrogen receptors: opposing prognostic indicators in meningiomas, 163
Results of attempted radical tumor removal and venous repair in 100 consecutive meningiomas involving the major dural sinuses, 514
tumor vaccine
Cellular immunity of patients with malignant glioma: prerequisites for dendritic cell vaccination immunotherapy, 41
tumor-to-tumor metastasis
Metastases to hemangioblastomas in von Hippel–Lindau disease, 256
Turcot syndrome
Primary cerebellopontine angle craniopharyngioma in a patient with Gardner syndrome. Case report and review of the literature, 330

ultrasonics
Focal disruption of the blood–brain barrier due to 260-kHz ultrasound bursts: a method for molecular imaging and targeted drug delivery, 445
ultrasound contrast agent
Focal disruption of the blood–brain barrier due to 260-kHz ultrasound bursts: a method for molecular imaging and targeted drug delivery, 445

vascular contraction
Involvement of phospholipase C in endothelin 1-induced stimulation of Ca^{++} channels and basilar artery contraction in rabbits, 288
vasospasm
Magnesium infusion for vasospasm prophylaxis after subarachnoid hemorrhage, 723
vein of Galen
Evaluation, management, and long-term follow up of vein of Galen malformations, 26
venous malformation
Evaluation, management, and long-term follow up of vein of Galen malformations, 26
venous reconstruction
Results of attempted radical tumor removal and venous repair in 100 consecutive meningiomas involving the major dural sinuses, 514
venous sinus thrombosis
Percutaneous transvenous embolization of a dural arteriovenous fistula through a mastoid emissary vein. Technical note, 636
ventricle
Solitary choroid plexus tuberculoma in an adult patient. Case illustration, 933
ventricular drainage
Intraoperative ventricular puncture during supraorbital craniotomy via an eyebrow incision. Technical note, 485
ventricular hysteresis
Very low pressure hydrocephalus. Report of two cases, 475
ventriculoatrial shunt
Accurate placement of the distal end of a ventriculoatrial shunt with the aid of real-time transesophageal echocardiography. Technical note, 153
ventriculoperitoneal shunt
Spontaneous bacterial peritonitis causing *Serratia marcescens and Proteus mirabilis* ventriculoperitoneal shunt infection. Case report, 320
Ventriculoperitoneal shunt insertion for the treatment of refractory perilymphatic fistula, 1
ventriculostomy
The use of waterjet dissection in endoscopic neurosurgery. Technical note, 928
vertebral artery
Angiographically occult, progressively expanding, giant vertebral artery aneurysm. Case report, 468
vertebral artery aneurysm
Treatment of vertebral artery aneurysms with transposition of the posterior inferior cerebellar artery to the vertebral artery combined with parent artery occlusion. Technical note, 781
vessel contractility
Gene expression and molecular changes in cerebral arteries following subarachnoid hemorrhage in the rat, 438
vestibular schwannoma
Improved preservation of hearing and facial nerve function in vestibular schwannoma surgery via the retrosigmoid approach in a series of 200 patients, 527
Linear accelerator radiosurgery for vestibular schwannomas, 657
Split facial nerve course in vestibular schwannomas, 698
Surgery for large vestibular schwannomas: how patients and surgeons perceive quality of life, 205
Using an end-to-side interposed sural nerve graft for facial nerve reinforcement after vestibular schwannoma resection. Technical note, 920
Vascular complications of vestibular schwannoma surgery: a comparison of the suboccipital retrosigmoid and translabyrinthine approaches, 200
vincristine
Phase II study of nimustine, carboplatin, vincristine, and interferon-β with radiotherapy for glioblastoma multiforme: experience of the Kyoto Neuro-Oncology Group, 385

volumetric measurement
Volumetric extent of resection and residual contrast enhancement on initial surgery as predictors of outcome in adult patients with hemispheric anaplastic astrocytoma, 34
von Hippel–Landau disease
Metastases to hemangioblastomas in von Hippel–Lindau disease, 256
Long-term natural history of hemangioblastomas in patients with von Hippel–Lindau disease: implications for treatment, 248

Walter E. Dandy
Personal recollections of Walter E. Dandy and his Brain Team. Historical vignette, 487

waterjet dissector
The use of waterjet dissection in endoscopic neurosurgery. Technical note, 928
weight loss
Peroneal neuropathy following successful bariatric surgery. Case report and review of the literature, 631
white matter
Optic radiations: a microsurgical anatomical study, 294
William S. Halsted
Personal recollections of Walter E. Dandy and his Brain Team. Historical vignette, 487
wrapping
Wrap-clipping with polytetrafluoroethylene for ruptured blisterlike aneurysms of the internal carotid artery. Technical note, 785
